

Digital Blood Pressure Monitoring Machine Blood Pressure Tester With Mobile Apps

Our Product Introduction

for more products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: China
- Brand Name: HANYUE
- Certification: CE/FCC/ Rohs /FDA
- Model Number: HY-01
- Minimum Order Quantity: 40pcs
- Price: 5USD ~ 15USD
- Packaging Details: OPP packing, 30PCS /Carton
- Delivery Time: 5-8 Working days
- Payment Terms: D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100000pcs

Product Specification

- Product Name: Blood Pressure Monitor
- Display: Digital Liquid Crystal Display
- Shut Off The Current: <20uA
- Inrush Current: <60mA
- Measurable Arm Circumference: 22cm-32cm
- Accessories Included: Warranty Card, Certificate, Wrist Band, Product Manual, Storage Bag
- Highlight: Digital Blood Pressure Monitoring Machine, Wearable Blood Pressure Monitoring Machine, Digital Wearable BP Monitor

Product Description

Blood Pressure Monitoring Goes High-Tech With Wearable Devices And Mobile Apps

Blood pressure monitoring is becoming increasingly high-tech with the development of wearable devices and mobile apps. These technologies are designed to make it easier for people to monitor their blood pressure regularly and to provide healthcare professionals with more accurate and detailed data. Wearable blood pressure monitors are devices that can be worn on the wrist or upper arm to continuously monitor blood pressure levels throughout the day. These devices use advanced sensors and algorithms to provide accurate and reliable blood pressure readings. Wearable blood pressure monitors can also help people track their blood pressure levels over time, which can provide valuable insights into their overall health and wellness.

Mobile apps are another high-tech solution for blood pressure monitoring. Many apps are available that allow users to track their blood pressure readings, set reminders for medication and doctor's appointments, and receive personalized feedback and guidance. Some apps can also connect to wearable blood pressure monitors, providing users with real-time data and analysis.

How can I measure my blood pressure to get accurate results?

1. Before turning on the device, please stay relaxed, then sit quietly and observe.
2. Place the cuff on the left arm above the elbow so that the edge is about 1 inch (2-3 cm) above the elbow joint and the tube is in the middle of the arm.
3. Raise the palm of your left hand and place your elbow on a table or flat surface. Sit upright and relax, do not move or talk, and breathe regularly.
4. Turn on the Blood Pressure Monitor, press the on/off button, stay relaxed and start the measurement.

The result will be displayed on the screen meanwhile voice broadcast.

*Why And When Do You Need To Choose An Upper Arm Blood Pressure Monitor ?

1, Old people whose vascular wall has poor flexibility. In this case, wrist blood pressure's result may be lower than the real. Because the wrist is the nerve endings, hypertensive patients may be complicated by arterial stenosis, blood clots and other vascular diseases, so the elderly use an Arm Blood Pressure Monitor that is more accurate than Wrist Blood Pressure Monitor!

2, Wrist blood pressure monitor is also accurate, but it is more suitable for young people, working people, travelling, gift. Because it is easy to carry.

What's in the box

- 1 x Electronic Blood Pressure Monitor
- 1 x Arm Band
- 1 x Storage Bag
