

The Benefits Of Using A Blood Pressure Monitor At Home

Our Product Introduction

for more products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: China
- Brand Name: HANYUE
- Certification: CE/FCC/ Rohs /FDA
- Model Number: BP-S10
- Minimum Order Quantity: 60pcs
- Price: 5USD ~ 15USD
- Packaging Details: OPP packing, 30PCS /Carton
- Delivery Time: 5-8 Working days
- Payment Terms: D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100000pcs

Convenient Dual Power Supply

Product Specification

- Product Name: Blood Pressure Monitor
- Measurable Arm Circumference: 22cm-32cm
- Instrument Classification: Class II
- Display: Digital Liquid Crystal Display
- Battery: 6VDC 4A Alkaline Batteries
- Function: Blood Pressure & Heart Rate Measuring
- Highlight: digital blood pressure machine, digital blood pressure monitors

Product Description

The Benefits of Using a Blood Pressure Monitor at Home

Using a blood pressure monitor at home can offer several benefits for managing your health:

1. **Better monitoring of blood pressure:** Regular monitoring of blood pressure can help identify high blood pressure (hypertension) early and allow for prompt treatment. It can also help track the effectiveness of medication and lifestyle changes.
2. **Convenience:** Visiting a healthcare provider for blood pressure monitoring can be time-consuming and inconvenient. With a home blood pressure monitor you can check your blood pressure at any time of the day, without leaving your home.
3. **Improved accuracy:** Home blood pressure monitoring can provide more accurate readings because it eliminates the "white coat effect" – the tendency for blood pressure to increase in a clinical setting due to stress or anxiety.
4. **Cost-effective:** Over time, the cost of a home blood pressure monitor can be less than regular visits to a healthcare provider for monitoring.
5. **Empowerment:** Home blood pressure monitoring can empower individuals to take control of their health and make informed decisions about their care. It can also encourage adherence to medication and lifestyle changes.
6. **Early detection:** Regular monitoring of blood pressure at home can help detect hypertension early, which can reduce the risk of complications such as heart disease, stroke, and kidney failure.

It's important to consult with your healthcare provider before purchasing a home blood pressure monitor to determine if it's appropriate for your individual health needs. They can also provide guidance on how to properly use the monitor and interpret the readings.

**Medical standard
Accuracy $\pm 3\text{mmHg}$**

What's in the box?

- 1 x Electronic Blood Pressure Monitor
- 1 x Arm Band
- 1 x Storage Bag

**Medical standard
Accuracy $\pm 3\text{mmHg}$**
