

Blood Pressure Monitors Can Help Detect Hypertension Early

Our Product Introduction

for more products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: China
- Brand Name: HANYUE
- Certification: CE/FCC/ Rohs /FDA
- Model Number: BP-S10
- Minimum Order Quantity: 30pcs
- Price: 5USD ~ 15USD
- Packaging Details: OPP packing, 30PCS /Carton
- Delivery Time: 5-8 Working days
- Payment Terms: D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100000pcs

Product Specification

- Type: Blood Pressure Monitor
- Shut Off The Current: <20uA
- Measurable Arm Circumference: 22cm-32cm
- Power Supply: 4 AAA Batteries 1.5V
- Memory Function: 99sets
- Instrument Classification: Class II
- Oem: Available

Product Description

Blood Pressure Monitors Can Help Detect Hypertension Early

Blood pressure monitors can be a useful tool for detecting hypertension early. Hypertension, or high blood pressure, a common condition that affects millions of people worldwide and is a leading risk factor for heart disease, stroke, and kidney failure.

Regular monitoring of blood pressure can help detect hypertension early, before it causes any symptoms or complications. Blood pressure monitors can be used at home or in a healthcare setting to obtain accurate readings of an individual's blood pressure.

Early detection of hypertension is important because it can be treated and managed with lifestyle changes, such as exercise and a healthy diet, and medication if necessary. Early treatment can also help prevent or delay the onset of complications associated with hypertension, such as heart disease and stroke.

It's important to note that blood pressure readings can vary throughout the day and may be influenced by factors such as stress, physical activity, and medication. Therefore, it's recommended to take multiple readings over time to get an accurate picture of an individual's blood pressure.

Consult with your healthcare provider for guidance on how often you should monitor your blood pressure and how to properly use a blood pressure monitor. They can also provide guidance on lifestyle changes and medication if necessary to manage hypertension.

*Why And When Do You Need To Choose An Upper Arm Blood Pressure Monitor ?

1, Old people whose vascular wall has poor flexibility. In this case, wrist blood pressure's result may be lower than the real. Because the wrist is the nerve endings, hypertensive patients may be complicated by arterial stenosis, blood clots and other vascular diseases, so the elderly use an Arm Blood Pressure Monitor that is more accurate than Wrist Blood Pressure Monitor!

2, Wrist blood pressure monitor is also accurate, but it is more suitable for young people, working people, travelling, gift. Because it is easy to carry.
