

OEM Medical Oxygen Concentrator 10L/min 700VA Home Health Oxygen Generator

Our Product Introduction

for more products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: China
- Brand Name: SS
- Certification: CE,ISO13485,SGS ,FCC,RoHs
- Model Number: 5AW
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: OPP packing ,1pcs per Carton. Carton size:540*370*695mm,Gross Weight:21kgs.
- Delivery Time: 7-10 Working days
- Payment Terms: T/T, Western Union
- Supply Ability: 1000pcs

Product Specification

- Product Name: Medical Oxygen Concentrator
- Oxygen Flow: 10L/min Adjustable
- Operation Noise: ≤55db(a)
- Oem: Acceptable
- Input Power: 700VA
- Power Supply: AC220V,50HZ
- Highlight: **OEM Medical Oxygen Concentrator,
Medical Oxygen Concentrator 10L/min,
700VA Home Health Oxygen Generator**

Product Description

Medical Oxygen Concentrator Helps The Home Oxygen Therapy And Breathe Easier

Medical oxygen concentrators are advanced medical devices that are designed to filter and concentrate oxygen from the surrounding air, delivering it to individuals who require supplemental oxygen as part of their medical treatment. They are typically used for home oxygen therapy and provide a continuous supply of oxygen to the individual through a nasal cannula or mask.

What are the risks of using a medical oxygen concentrator?

While medical oxygen concentrators are generally safe and effective, there are a few risks associated with their use. These risks can be minimized by using the device properly and under the guidance of a healthcare professional. Some potential risks include:

1. **Oxygen toxicity:** If an individual receives too much supplemental oxygen for an extended period of time, it can cause oxygen toxicity, which can lead to lung damage, seizures, and other complications.
2. **Fire hazard:** Medical oxygen concentrators use electricity to operate, and therefore pose a risk of fire if not used properly. It's important to keep the device away from open flames, smoking materials, and other sources of heat or ignition.
3. **Infection risk:** If the nasal cannula or mask is not cleaned properly, it can become a breeding ground for bacteria and lead to infections.
4. **Skin irritation:** Prolonged use of a nasal cannula or mask can cause skin irritation and breakdown, especially if the device is not fitted properly.
5. **Equipment malfunction:** Like any medical device, medical oxygen concentrators can malfunction. It's important to follow the manufacturer's instructions for use and maintenance to minimize the risk of equipment failure.

It's important to discuss any concerns or potential risks with a healthcare professional before using a medical oxygen concentrator. They can provide guidance on how to properly use and maintain the device, as well as monitor for any potential complications.
