

How Medical Oxygen Concentrators Are Improving Lives For Patients

Our Product Introduction

for more products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: China
- Brand Name: SS
- Certification: CE,ISO13485,SGS ,FCC,RoHs
- Model Number: 5AW
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: OPP packing ,1pcs per Carton. Carton size:540*370*695mm,Gross Weight:21kgs.
- Delivery Time: 7-10 Working days
- Payment Terms: T/T, Western Union
- Supply Ability: 1000pcs

Product Specification

- Product Name: Medical Oxygen Concentrator
- Oxygen Flow: 1-10L/min Adjustable
- Oem: Acceptable
- Power Supply: AC220V,50HZ
- Weight: 27kg
- Oxygen Purity: 93%±3%
- Highlight: 10l medical oxygen concentrator,
10l/min medical oxygen concentrator,
10l medical grade oxygen concentrator

How Medical Oxygen Concentrators Are Improving Lives For Patients ?

Medical oxygen concentrators are devices that extract oxygen from the air and deliver it to patients who require higher levels of oxygen than can be obtained through normal breathing. Here are some ways that medical oxygen concentrators are improving lives for patients:

Increased mobility: Medical oxygen concentrators are portable and allow patients to move around more freely. This means that patients who need oxygen therapy can continue to lead active lives and participate in activities that they enjoy.

Improved sleep: Patients with respiratory conditions often experience difficulty breathing during sleep. Medical oxygen concentrators can help improve the quality of sleep for these patients by ensuring that they receive the necessary oxygen while they sleep.

Reduced hospitalizations: By providing oxygen therapy at home, medical oxygen concentrators can reduce the need for hospitalizations. This not only improves the quality of life for patients but also reduces healthcare costs.

Improved exercise tolerance: Patients who require oxygen therapy may experience shortness of breath during physical activity. Medical oxygen concentrators can help improve exercise tolerance by providing the necessary oxygen to the patient during exercise.

Improved quality of life: Patients who require oxygen therapy often experience reduced quality of life due to their condition. Medical oxygen concentrators can improve the quality of life for these patients by providing them with the necessary oxygen to breathe more easily and participate in daily activities.
