

Medical Oxygen Concentrators Provide Crucial Support For COVID-19 Patients With Severe Respiratory Symptoms

Our Product Introduction

for more products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: China
- Brand Name: Sunshine Medical
- Certification: CE,ISO13485,SGS ,FCC,RoHs
- Model Number: 5AW
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: OPP packing ,1pcs per Carton. Carton size:540*370*695mm,Gross Weight:21kgs.
- Delivery Time: 7-10 Working days
- Payment Terms: T/T, Western Union
- Supply Ability: 1000pcs

Product Specification

- Product Name: Medical Oxygen Concentrator
- Oxygen Flow: 1-10L/min Adjustable
- Oxygen Concentration: 95% ($\pm 3\%$)
- Power: $\leq 400\text{VA}$
- Operating Noise: $\leq 52\text{dB(A)}$
- Input Power: AC220V/50HZ
- Highlight: 10l medical oxygen concentrator,
10l/min medical oxygen concentrator,
10l medical grade oxygen concentrator

Product Description

Medical Oxygen Concentrators Provide Crucial Support For COVID-19 Patients With Severe Respiratory Symptoms

Medical oxygen concentrators have played a crucial role in supporting COVID-19 patients with severe respiratory symptoms. COVID-19 is a respiratory illness caused by the SARS-CoV-2 virus, and it can cause severe respiratory symptoms, such as shortness of breath and low oxygen levels in the blood. The use of medical oxygen concentrators can help alleviate these symptoms and prevent complications such as organ failure and death.

When COVID-19 patients with severe respiratory symptoms are admitted to the hospital, they may require supplemental oxygen therapy. Medical oxygen concentrators can provide a reliable and continuous source of oxygen to these patients, helping them breathe more easily and improving their oxygen saturation levels.

In addition to providing oxygen therapy in hospital settings, medical oxygen concentrators have also been used to support COVID-19 patients in home care settings. With the surge in COVID-19 cases and hospitalizations during the pandemic, medical oxygen concentrators have been an important tool in helping patients receive the care they need at home.

However, it's important to note that medical oxygen concentrators are not a substitute for medical care, and patients with severe respiratory symptoms should seek medical attention immediately. COVID-19 is a serious illness that requires prompt and appropriate medical care, including oxygen therapy when needed.
