

Medical Oxygen Concentrators A Key Tool In The Fight Against COVID-19

Basic Information

- Place of Origin:
- Brand Name:
- Certification:
- Model Number:
- Minimum Order Quantity: Negotiable
- Price:
- Packaging Details:
- Delivery Time:
- Payment Terms:
- Supply Ability:

Product Specification

- Product Name:
- Warranty:
- Power:
- Operating Noise:
- Display Control:
- Input Power:
- Highlight:

- Medical Oxygen Concentrator One Years
- ≤400VA

China

5BW

Negotiable

1000pcs

Sunshine Medical

7-10 Working days T/T, Western Union

CE,ISO13485,SGS ,FCC,RoHs

OPP packing ,1pcs per Carton. Carton

size:540*370*695mm,Gross Weight:21kgs.

- ≤52dB(A)
- LCD Screen
 - AC220V/50HZ
- Icd screen medical oxygen concentrator, Icd screen medical grade oxygen concentrator

Medical Oxygen Concentrators : A Key Tool In The Fight Against COVID-19

Medical oxygen concentrators have been a key tool in the fight against COVID-19. COVID-19 is a respiratory illness caused by the SARS-CoV-2 virus, and it can cause severe respiratory symptoms, such as shortness of breath and low oxygen levels in the blood. Medical oxygen concentrators can provide a reliable and continuous source of oxygen to patients with COVID-19, helping them breathe more easily and improving their oxygen saturation levels.

Medical oxygen concentrators have been particularly important in the treatment of COVID-19 patients in low-resource settings, where access to oxygen therapy may be limited. During the COVID-19 pandemic, there has been a surge in demand for medical oxygen concentrators, as hospitals and healthcare facilities around the world have struggled to meet the needs of patients with severe respiratory symptoms.

In addition to their use in hospital settings, medical oxygen concentrators have also been used to support COVID-19 patients in home care settings. Portable oxygen concentrators, in particular, have become increasingly popular, as they allow patients to receive oxygen therapy while remaining mobile and active.

Overall, medical oxygen concentrators have played a crucial role in the fight against COVID-19, helping to save lives and improve outcomes for patients with severe respiratory symptoms. However, it's important to note that medical oxygen concentrators are not a substitute for medical care, and patients with COVID-19 should seek medical attention immediately if they experience severe respiratory symptoms or other concerning symptoms.
