

## Medical Portable Comfort Breast Pump Technology For Nursing Mothers

### Our Product Introduction

for more products please visit us on [oxygenconcentratormedical.com](http://oxygenconcentratormedical.com)

#### Basic Information

- Place of Origin: China
- Brand Name: HANYUE
- Certification: CE/FDA/UKCA/FC/ROHS
- Model Number: S32
- Minimum Order Quantity: 24pcs
- Price: 26USD ~ 28USD
- Packaging Details: OPP packing with 24pcs per carton
- Delivery Time: 5-8 Working days
- Payment Terms: T/T, Western Union, MoneyGram, D/P, T/T, L/C, D/A
- Supply Ability: 300000PCS

#### Product Specification

- Model Number: S32
- Material: Food Grade PP+Silicone
- Service: OEM/ODM
- Size: 136\*111\*70 MM
- Levels: 9-12 Levels
- Charging Time: 2 Hours
- Highlight: **Medical Comfort Breast Pump,  
OEM Comfort Breast Pump,  
Portable Breast Pump For Nursing Mothers**

## Product Description

### Medical Breast Pump Technology Offers Improved Comfort And Efficiency For Nursing Mothers

Medical breast pump technology has advanced significantly in recent years, offering improved comfort and efficiency for nursing mothers. Breastfeeding is an important source of nutrition for infants, and medical breast pumps can help ensure that babies receive the benefits of breast milk even when direct breastfeeding is not possible.

Newer medical breast pumps are designed to be more comfortable and efficient than older models. They feature soft, flexible breast shields that conform to the shape of the breast, reducing discomfort and improving milk flow. Some pumps also offer customizable settings for suction and speed, allowing mothers to adjust the pump to their individual needs.

In addition to improved comfort, newer medical breast pumps are also more efficient, allowing mothers to express milk more quickly and with less effort. Some pumps are designed to mimic the natural suckling motion of a baby, which can help stimulate milk production and improve milk flow.

Newer medical breast pumps also offer improved portability and convenience. Some pumps are small enough to fit in a purse or backpack, allowing mothers to express milk on-the-go or in private settings. Many pumps also offer battery-powered or rechargeable options, eliminating the need for an electrical outlet.

Overall, the advancements in medical breast pump technology have made it easier and more comfortable for nursing mothers to express milk and provide the nutrition their babies need. It's important for healthcare providers to educate mothers on the different types of breast pumps available and to provide support and resources for successful breastfeeding.

S32 Wearable breast pump

## Small and portable, suitable for multiple occasions

Convenient for sports, reading books, taking children, etc.
