Basic Information

- Place of Origin: China
- Brand Name: HANYUE
- Certification: CE/FDA/UKCA/FC/ROHS
- Model Number: S32
- Minimum Order Quantity: 24pcs
- Price: 26USD ~ 28USD
- Packaging Details: OPP packing with 24pcs per carton
- Delivery Time: 5-8 Working days
- Payment Terms: T/T, Western Union, MoneyGram, D/P, T/T, L/C, D/A
- Supply Ability: 300000PCS

Product Specification

- Model Number: S32
- Levels: 9-12 Levels
- Charging Time: 2 Hours
- Working Time: 80 Minutes
- Sample: Available
- Package: 24pcs Per Carton
- Highlight: **Medical Comfortable Breast Pump,
Portable Comfortable Breast Pump,
Convenient Breast Pump For Working Mothers**

Product Description

Medical Breast Pumps Provide Flexibility And Convenience For Working Mothers

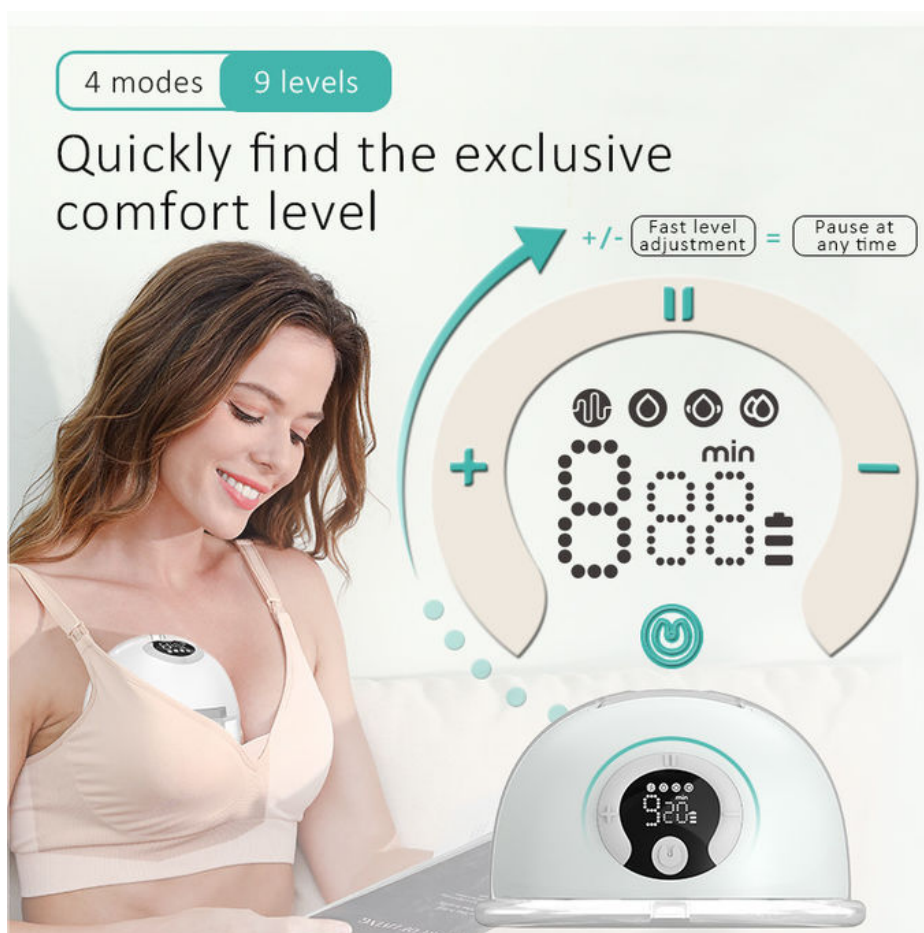

Medical breast pumps provide flexibility and convenience for working mothers who want to continue breastfeeding their babies. Breastfeeding is an important source of nutrition for infants, and medical breast pumps can help ensure that babies receive the benefits of breast milk even when direct breastfeeding is not possible.

Working mothers often face challenges in balancing their work responsibilities with their desire to continue breastfeeding their babies. Medical breast pumps can help alleviate some of these challenges by allowing mothers to express milk during working hours and store it for later use.

Newer medical breast pumps are designed to be more portable and convenient, allowing mothers to express milk on-the-go or in private settings. Some pumps are small enough to fit in a purse or backpack, and many offer battery-powered or rechargeable options, eliminating the need for an electrical outlet.

In addition to improved portability, newer medical breast pumps also offer customizable settings for suction and speed, allowing mothers to adjust the pump to their individual needs. This can help improve milk flow and reduce discomfort during pumping.

Overall, medical breast pumps provide flexibility and convenience for working mothers who want to continue breastfeeding their babies. It's important for healthcare providers to educate mothers on the different types of breast pumps available and to provide support and resources for successful breastfeeding while balancing work responsibilities.
