Basic Information

- Place of Origin: China
- Brand Name: HY
- Certification: CE/FDA/UKCA/FC/ROHS
- Model Number: S12
- Minimum Order Quantity: 24pcs
- Price: 24USD ~ 26USD
- Packaging Details: OPP packing with 24pcs per carton
- Delivery Time: 5-8 Working days
- Payment Terms: T/T, Western Union, MoneyGram, D/P, T/T, L/C, D/A
- Supply Ability: 300000PCS

Product Specification

- Model Number: S12
- Material: Food Grade PP+Silicone
- Pattern Type: Printed
- Flow Velocity: Variable Flow
- Service: OEM/ODM
- Driven Type: Electric
- Highlight: **Food Grade Medical Breast Pump,
PP Silicone Medical Breast Pump,
Wireless Breast Pump For Nursing Mothers**

Product Description

Wireless Medical Breast Pump Gives Nursing Mothers Freedom And Flexibility To Express Milk Anytime,Anywhere !

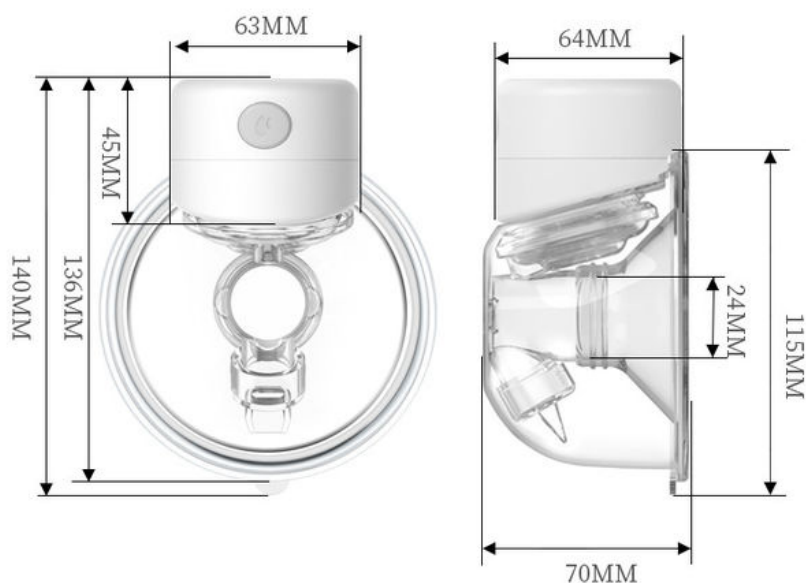

Electric pumps are the most common type of medical breast pump, and they use an electric motor to create suction. They can be single or double-pumped, which means they can extract milk from one breast or both breasts simultaneously. Electric pumps are generally faster and more efficient than manual pumps, but they can be more expensive.

Manual pumps, as the name suggests, require manual effort to express milk. They can be useful for occasional use or for women who prefer a less bulky and less expensive option.

Wearable pumps are a newer type of breast pump that can be worn discreetly under clothing. They are typically wireless and hands-free, allowing women to express milk while doing other activities. Wearable pumps can be more expensive than other types of pumps, but they offer convenience and flexibility for busy mothers.

Medical breast pumps are often used by working mothers who need to express milk while away from their babies, but they can also be useful for women who have difficulty breastfeeding or need to increase their milk supply. Some insurance plans may cover the cost of a breast pump, so it's worth checking with your provider to see if you're eligible. It's also important to properly clean and sterilize your breast pump after each use to prevent contamination and ensure the safety of your milk.

PRODUCT PARAMETER

Product name: wearable electric breast pump	
Material: PP material	Model: S12
Size: 63x140x70mm (capacity180ml)	

Weight: 0.5 pounds
