### Basic Information

- Place of Origin: China
- Brand Name: TPH
- Certification: CE/FDA/UKCA/FC/ROHS
- Model Number: S12
- Minimum Order Quantity: 24pcs
- Price: 24USD ~ 26USD
- Packaging Details: OPP packing with 24pcs per carton
- Delivery Time: 5-8 Working days
- Payment Terms: T/T, Western Union, MoneyGram, D/P, T/T, L/C, D/A
- Supply Ability: 300000PCS

Product name: wearable electric breast pump	
Material: PP material	Model: S12
Size: 63x140x70mm (capacity180ml)	

### Product Specification

- Model Number: S12
- Material: Food Grade PP+Silicone
- Pattern Type: Printed
- Working Time: 80 Minutes
- Sample: Available
- Package: 24pcs Per Carton
- Highlight: **Medical Breast Pump For Busy Moms, Wireless Medical Breast Pump Technology, Wireless Hands Free Electric Breast Pump**

## Product Description

### Medical Breast Pump Technology Offers Wireless And Hands-Free Pumping For Busy Mothers

Medical breast pump technology has come a long way in recent years, with new innovations that make pumping more convenient and comfortable for nursing mothers. One of the latest advances is wireless and hands-free pumping, which allows busy mothers to pump milk while on-the-go, without needing to be tethered to a wall outlet or hold the pump in place.

These new medical breast pumps use wireless technology to connect to a smartphone or other device, allowing mothers to control the pump and monitor their milk production through an app. The pumps are designed to be compact and portable, making them easy to carry in a bag or purse. They also feature soft, flexible cups that fit comfortably over the breast, reducing discomfort and improving milk output.

The hands-free design of these medical breast pumps is especially beneficial for busy mothers who need to pump milk while working, traveling, or caring for other children. With wireless and hands-free pumping, mothers can continue their daily activities while expressing milk for their babies, without needing to take time out of their busy schedules.

These new medical breast pump technologies offer nursing mothers greater convenience and flexibility, making it easier for them to provide breast milk for their babies. This can help improve infant health outcomes, as breast milk has many benefits for infants, including protection against infections, improved digestion, and better cognitive development.

**Weight:** 0.5 pounds

Wearable

No bounds More comfort

More fresh breast milk to baby,  
More sleeping time for mom.
