

Electric Medical Breast Pump For Nursing Moms Improved Milk Flow And Comfort

Our Product Introduction

for more products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: China
- Brand Name: HY
- Certification: CE/FDA/UKCA/FC/ROHS
- Model Number: S21
- Minimum Order Quantity: 24pcs
- Price: 23USD ~ 25USD
- Packaging Details: OPP packing with 24pcs per carton
- Delivery Time: 5-8 Working days
- Payment Terms: T/T, Western Union, MoneyGram, D/P, T/T, L/C, D/A
- Supply Ability: 300000PCS

Product Specification

- Model Number: S12
- Material: Food Grade PP+Silicone
- Pattern Type: Printed
- Flow Velocity: Variable Flow
- Service: OEM/ODM
- Driven Type: Electric
- Shape: Large Arc Type
- Size: 136*111*70 MM
- Levels: 9-12 Levels
- Charging Time: 2 Hours
- Working Time: 80 Minutes
- Sample: Available
- Package: 24pcs Per Carton
- Highlight: **Electric Medical Breast Pump, Comfort Medical Breast Pump, Electric Breast Pump For Nursing Moms**

Product Description

Medical Breast Pump Design Mimics Natural Breastfeeding For Improved Milk Flow And Comfort

Medical Breast Pump is one of the key challenges for nursing mothers who use medical breast pumps is achieving a comfortable and effective pumping experience. Traditional breast pumps can be uncomfortable, and they may not always stimulate milk production as effectively as direct breastfeeding. However, a new medical breast pump design that mimics natural breastfeeding has been developed to improve milk flow and comfort during pumping.

This new medical breast pump design uses a suction cup that fits over the breast and mimics the natural rhythm and suction of a baby's mouth. The suction cup is designed to compress and release the breast tissue, creating a more comfortable and effective pumping experience. This can help stimulate milk production and improve milk flow, making it easier for nursing mothers to express milk for their babies.

In addition to its advanced suction cup design, the new medical breast pump also features adjustable suction and speed settings, allowing nursing mothers to customize the pumping experience to their individual needs. The pump is also designed to be compact and portable, making it easy to use on-the-go.

The new medical breast pump design that mimics natural breastfeeding represents a significant breakthrough in breast pump technology. By improving milk flow and comfort during pumping, it can help nursing mothers provide breast milk for their babies more effectively and easily. This can lead to improved infant health outcomes, as breast milk has many benefits for infants, including protection against infections, improved digestion, and better cognitive development.

Weight: 0.5 pounds

Six advantages elaborate design

Product features

Hand-free design

Wireless hands Liberation

Easy to wear

Invisible design

LED display

Visualization of breast
feeding process

3 Modes

12 gear adjustment

Safe and reliable
