

## Medical Fingertip Pulse Oximeter For Home Monitoring 50g Weight

Our Product Introduction

for more products please visit us on [oxygenconcentratormedical.com](http://oxygenconcentratormedical.com)

### Basic Information

- Place of Origin: China
- Brand Name: ACCARE
- Certification: CE/CFDA/RoHs/FCC/ISO13485/FDA
- Model Number: FS-10E
- Minimum Order Quantity: 200PCS
- Price: 8~12USD
- Packaging Details: OPP packing , 200pcs Per Carton

### Product Specification

- Type: Fingertip Pulse Oximeter
- Model Number: FS-10A,FS-10B,FS-10C,FS-10E
- Power Supply: Removable Battery
- Safety Standard: EN ISO13485.2016
- Shelf Life: One Years
- Feature: LED/TFT/OLED ,Easy To Carry
- Highlight: **Medical Fingertip Pulse Oximeter,  
Fingertip Pulse Oximeter 50g,  
Medical Home Pulse Oximeter**

## Product Description

### Medical Pulse Oximeter Sales Surge As COVID-19 Pandemic Highlights Importance Of Home Monitoring

Pulse oximeters are medical devices that measure the oxygen saturation in a person's blood. During the COVID-19 pandemic, pulse oximeters have become increasingly popular as people have sought ways to monitor their health at home.

Many people with COVID-19 experience low oxygen levels, and pulse oximeters can provide an early warning sign of this condition. By monitoring their oxygen levels at home, people can potentially catch a drop in oxygen saturation early and seek medical attention before their condition worsens.

As a result of the pandemic, sales of medical pulse oximeters have surged. Many retailers have reported increased demand for pulse oximeters, and some manufacturers have struggled to keep up with the demand.

In addition to their use during the pandemic, medical pulse oximeters are also used to monitor the health of people with respiratory conditions such as asthma, chronic obstructive pulmonary disease (COPD), and sleep apnea. They are also used during surgery and in critical care settings to monitor patients' oxygen levels.

The surge in sales of medical pulse oximeters during the COVID-19 pandemic highlights the importance of home monitoring for early detection of health issues. As technology continues to advance, pulse oximeters are likely to become even more accessible and user-friendly, helping people to monitor their health more effectively and improve their overall well-being.

#### Specification:

Dimension: 60mm×35mm×32mm

Weight: 50g

SPO2 Range: 0% - 99%.

SPO2 Resolution: +- 1%.

Pulse Rate Range: 30-250 bpm.

Pulse Rate Resolution: +- 1bpm.

Power Requirements: 2 × 1.5V AAA alkaline battery or rechargeable battery instead, adaptable range: 2.6V~3.6V.

**Measurement Performance:** Oxyhemoglobin/Pulse value is accurate when the pulse-filling rate is 0.4%.

The deviation is smaller than +- 1 % when measured in natural indoor lighting conditions.

One size fits all

#### Package Contents:

1\*Pulse Oximeter

1\*One hanging rope

1\*User Manual

1\*Storage bag

## Package Contents

Optional configuration: protective bag, silicone protective cover.
