

Comfortable Medical Monitoring Pulse Oximeter Convenient For Active Individuals

Our Product Introduction

for more products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: China
- Brand Name: ACCARE
- Certification: CE/CFDA/RoHS/FCC/ISO13485/FDA
- Model Number: FS-10E
- Minimum Order Quantity: 200PCS
- Price: 8~12USD
- Packaging Details: OPP packing , 200pcs Per Carton

 accurate

Product Specification

- Model Number: FS-10A,FS-10B,FS-10C,FS-10E
- Power Supply: Removable Battery
- Shelf Life: One Years
- Feature: LED/TFT/OLED ,Easy To Carry
- OEM/ODM: Acceptable
- Instrument Classification: Class II
- Highlight: **Medical Monitoring Pulse Oximeter,
Comfortable Monitoring Pulse Oximeter**

Easy to use Non-invasive

After activating the oximeter, it will automatically detect and the measurement result will be read about 10 seconds

Product Description

Medical Pulse Oximeter Provide Comfortable And Convenient Monitoring For Active Individuals

Medical pulse oximeters have become increasingly popular for individuals who lead active lifestyles and want to monitor their health while on the go. Traditional pulse oximeters are bulky and must be attached to a fingertip or earlobe to take a reading. However, new wearable medical pulse oximeter devices have been developed to provide more comfortable and convenient monitoring for active individuals.

These new medical pulse oximeters are designed to be worn on the wrist or finger, like a smartwatch or fitness tracker. They use optical sensors to measure blood oxygen saturation levels and heart rate, providing continuous readings that can be tracked and analyzed over time.

The wearable medical pulse oximeter devices are comfortable to wear and do not restrict movement, making them ideal for individuals who want to monitor their health while exercising or performing other physical activities. They are also convenient for individuals who need to monitor their oxygen levels continuously due to respiratory conditions such as asthma or COPD.

In addition to their advanced monitoring capabilities, these wearable medical pulse oximeter devices often include features such as smartphone connectivity, activity tracking, and sleep monitoring. This makes them a versatile tool for individuals who want to track multiple aspects of their health and wellness.

The development of wearable medical pulse oximeter devices represents a significant breakthrough in health monitoring technology. By providing comfortable and convenient monitoring for active individuals, these devices can help people take control of their health and improve their overall well-being.

Easy to use Non-invasive

After activating the oximeter, it will automatically detect and the measurement result will be read about 10 seconds

Package Contents:

- 1*Pulse Oximeter
- 1*One hanging rope
- 1*User Manual
- 1*Storage bag

Package Contents

Optional configuration: protective bag, silicone protective cover.
