

## FS-10E Medical Pulse Oximeter Non Invasive Continuous Blood Pressure Monitoring Devices

Our Product Introduction

for more products please visit us on [oxygenconcentratormedical.com](http://oxygenconcentratormedical.com)

### Basic Information

- Place of Origin: China
- Brand Name: ACCARE
- Certification: CE/CFDA/RoHS/FCC/ISO13485/FDA
- Model Number: FS-10E
- Minimum Order Quantity: 200PCS
- Price: 8~12USD
- Packaging Details: OPP packing , 200pcs Per Carton

 accurate

### Product Specification

- Warranty: 12months
- Power Supply: Removable Battery
- Safety Standard: EN ISO13485.2016
- Feature: LED/TFT/OLED ,Easy To Carry
- Instrument Classification: Class II
- Function: Measure PR, SpO2
- Highlight: **Medical Pulse Oximeter Devices,  
Medical Pulse Oximeter Non Invasive,  
Medical Continuous Blood Pressure Monitoring  
Devices**

## Product Description

### Medical Pulse Oximeter Devices With Non-Invasive Continuous Blood Pressure Monitoring Technology

Medical pulse oximeters have traditionally been used to monitor the oxygen saturation levels and heart rate of patients non-invasively. However, recent advancements in technology have allowed for the development of new medical pulse oximeter devices that also incorporate non-invasive continuous blood pressure monitoring.

These new medical pulse oximeter devices use advanced sensors and algorithms to measure blood pressure continuously and non-invasively. This technology allows healthcare providers to monitor patients' blood pressure in real-time, providing valuable information about their condition and allowing for early detection of potential issues.

The integration of non-invasive continuous blood pressure monitoring technology into medical pulse oximeters is particularly useful for patients with cardiovascular issues, such as hypertension or heart disease. These patients often require frequent blood pressure monitoring, and the non-invasive nature of this technology makes it more convenient and comfortable for patients.

In addition to its use in monitoring patients with cardiovascular issues, the integration of non-invasive continuous blood pressure monitoring technology into medical pulse oximeters has also proven useful in critical care settings. Healthcare providers can use this technology to monitor patients' blood pressure continuously and respond quickly to changes in their condition.

The development of new medical pulse oximeter devices with non-invasive continuous blood pressure monitoring technology represents a significant breakthrough in patient monitoring and care. By providing real-time data on oxygen saturation levels, heart rate, and blood pressure, these devices can help healthcare providers to deliver more efficient and effective care to patients and improve patient outcomes.

#### Package Contents:

- 1\*Pulse Oximeter
- 1\*One hanging rope
- 1\*User Manual
- 1\*Storage bag

## Package Contents

Optional configuration: protective bag, silicone protective cover.
