

Safe Healthy Fetal Heart Detector 3mhz Doppler Pregnancy Fetal Heart Monitor

Our Product Introduction

for more products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: China
- Brand Name: HANYUE
- Certification: CE/FDA/ISO13485/FCC/RoHs
- Model Number: JSL-T501
- Minimum Order Quantity: 60pcs
- Price: 7USD
- Packaging Details: Each Boxes OPP packing /12.6 KGS / Per carton: 53*29*37cm / 60PCS Per Carton.
- Delivery Time: 3-5 Working days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 100000PCS

Product Specification

- Battery: D.C. 3V 2*AA Batteries
- Display: LCD Display
- Size: 105*178*45mm
- Weight: 180g
- Warranty: 1 Year
- Color: White, Pink Blue
- Highlight: **Fetal Heart Detector 3mhz,
Healthy Fetal Heart Detector,
Doppler Pregnancy Fetal Heart Monitor**

Product Description

Doppler Fetal Heart Detector Monitor Is Safe And Healthy Pregnancy Journey For Expectant Parents

The Doppler Fetal Heart Monitor, also known as Fetal Heart Detector, is a safe and non-invasive way for expectant parents to monitor the health of their developing fetus during pregnancy. It uses ultrasound technology to detect and monitor the fetal heartbeat, providing valuable information about the health and well-being of the fetus.

Fetal heart detector technology is typically used during routine prenatal appointments to check the fetal heart rate and rhythm. This information can help healthcare providers identify potential problems, such as fetal distress or growth issues, and intervene early if necessary to provide appropriate care.

By using fetal heart detector technology, expectant parents can also monitor the fetal heartbeat at home with a handheld device. This can provide peace of mind and reassurance, especially for high-risk pregnancies or when there are concerns about the baby's health.

The Doppler Fetal Heart Monitor is a safe and effective tool for monitoring the health of a developing fetus during pregnancy. It provides valuable information that can help ensure a healthy pregnancy and delivery, making it an essential tool for expectant parents on their pregnancy journey.

Doppler Fetal Heart Monitor and how it can benefit expectant parents during their pregnancy journey:

- Doppler Fetal Heart Monitor is a handheld device that can be used at home by expectant parents to listen to their baby's heartbeat. This can provide reassurance and peace of mind, especially for those who may have concerns about their baby's health or are experiencing a high-risk pregnancy.

- The device is easy to use and requires no special training. It consists of a handheld probe that is placed on the mother's abdomen, and it emits high-frequency sound waves that bounce off the fetal heart and create a sound that can be heard through the device's speakers.

- Doppler Fetal Heart Monitor is a safe and non-invasive procedure that can be performed throughout pregnancy. It does not pose any known risks to the mother or fetus.

- In addition to monitoring the fetal heart rate, Doppler Fetal Heart Monitor can also be used to measure other parameters, such as fetal movements and amniotic fluid volume. This information can help expectant parents and healthcare providers monitor the health and well-being of the developing fetus.

- Doppler Fetal Heart Monitor can also be used to bond with the baby. Many expectant parents find it comforting to hear their baby's heartbeat and feel more connected to their pregnancy.

Doppler Fetal Heart Monitor is a valuable tool for expectant parents on their pregnancy journey. It provides a non-invasive and safe way to monitor the health of their developing fetus and can offer peace of mind and reassurance during what can be an exciting yet stressful time. It is important to note that while the device can provide valuable information, it should not replace regular prenatal care and check-ups with a healthcare provider.

It is recommended that time be measured

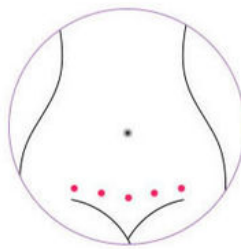

130 minutes after wake up

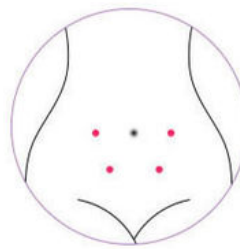

30-60 minutes after lunch

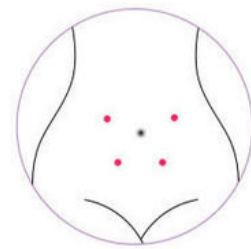

30 minutes before bedtime

12-24 weeks

24-32 weeks

32-40 weeks

Product Information

PRODUCT INFORMATION

Product name : Fetal Doppler

Rated voltage : 3.0MHz

Type of power supply : Two AA batteries

Heart rate range : 50BPM-230BPM

Ultrasonic frequency : 3.0MHz

Accuracy : ± 2 BPM
