

Medical Oxygen Concentrator Is The Reliable And Convenient For Patients In Breathing Difficulties

Our Product Introduction

for more products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: China
- Brand Name: MEDIRS
- Certification: CE,ISO13485,SGS ,FCC,RoHs
- Model Number: JY102W
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: OPP packing ,1pcs per Carton. Carton size:540*370*695mm,Gross Weight:21kgs.
- Delivery Time: 3-5 Working days
- Payment Terms: T/T, Western Union
- Supply Ability: 1000pcs

Product Specification

- Product Name: Home Use Oxygen Concentrator
- Continuous Working Time: 24 Hours
- Safety Standard: GB/T 18830-2009
- Oxygen Flow: 1-7L/min
- Oxygen Concentration: 93%±3%(1L/min)
- Power Source: Electric
- Instrument Classification: Class II
- Function: Oxygen Generator With Nebulizer
- After Sale Service: Online Technical Support
- Warranty: One Years
- Remote Control: Yes
- Operating Noise: ≤45dB(A)
- Display Control: LCD Screen
- Input Power: 220V/110V
- Net Weight: 5.5kqs

Product Description

Medical Oxygen Concentrator Is The Reliable And Convenient For Patients In Breathing Difficulties

Medical oxygen concentrators are reliable and convenient devices that provide a continuous source of oxygen for patients with respiratory conditions, such as COPD, asthma, and sleep apnea. They work by filtering and concentrating oxygen from the air, delivering it to the patient through a nasal cannula or mask.

Patients with breathing difficulties often require supplemental oxygen therapy to maintain adequate oxygen levels in their blood. Medical oxygen concentrators are a safe and effective way to provide oxygen therapy, allowing patients to breathe more easily and improve their quality of life.

Compared to other oxygen delivery systems, such as oxygen tanks, medical oxygen concentrators are more convenient because they do not require frequent refilling or replacement. They are also more cost-effective in the long run, making them a popular option for patients with chronic respiratory conditions.

1. Continuous oxygen therapy: Medical oxygen concentrators provide a continuous source of oxygen, ensuring that patients with respiratory conditions receive the oxygen they need to breathe properly.
2. Convenience: Medical oxygen concentrators are easy to use and require no special training or maintenance. Patients can use them at home or on the go, making them a convenient option for those with mobility issues.
3. Cost-effective: Compared to other oxygen delivery systems, such as oxygen tanks, medical oxygen concentrators are more cost-effective in the long run. They do not require frequent refilling or replacement, which can save patients money over time.
4. Improved quality of life: Medical oxygen concentrators can significantly improve the quality of life for patients with respiratory conditions. By providing a continuous source of oxygen, patients can breathe more easily, sleep better, and engage in more physical activities.
5. Safety: Medical oxygen concentrators are a safe and reliable way to deliver oxygen therapy. They are designed to deliver the right amount of oxygen to the patient, reducing the risk of oxygen toxicity or other complications.

Wire-less Remote Control

Portable and steady in your hand

Power on/off

Timing +/-

Smart wireless
remote control

HD large screen voice broadcast function

Big fonts, big buttons, backlit display, easy for elders to use.
