

Convenient Medical Oxygen Concentrators For Patients

Basic Information

Place of Origin: ChinaBrand Name: MEDIRS

• Certification: CE,ISO13485,SGS ,FCC,RoHs

Model Number: JY102WMinimum Order Quantity: NegotiablePrice: Negotiable

• Packaging Details: OPP packing ,1pcs per Carton. Carton

size:540*370*695mm,Gross Weight:21kgs.

Delivery Time: 3-5 Working daysPayment Terms: T/T, Western Union

• Supply Ability: 1000pcs

Product Specification

• Instrument Classification: Class II

• Function: Oxygen Generator With Nebulizer

After Sale Service: Online Technical Support

Operating Noise: ≤45dB(A)
Carton Size: 35.5*23*37cm
Outlet Pressure: 8.5 PSI
OEM/ODM: Acceptable

• Highlight: Convenient Medical Oxygen Concentrators,

Convenient Medical Oxygen Concentrators for Patients

Medical oxygen concentrators are devices that provide a convenient and cost-effective way for patients with respiratory condition to receive supplemental oxygen. These devices work by filtering and concentrating oxygen from the air, which is then delivered to the patient through a nasal cannula or mask.

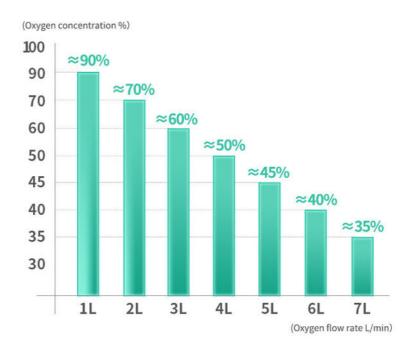

There are many different types of medical oxygen concentrators available on the market, with various features and capabilities. Here are some factors to consider when choosing a medical oxygen concentrator for a patient:

- 1. Portability: If the patient needs to travel or move around frequently, a portable oxygen concentrator may be the best option. Portable concentrators are lightweight and compact, and can be easily carried in a backpack or shoulder bag.
- 2. Flow rate: The flow rate of the concentrator determines how much oxygen it can deliver to the patient. Patients with more severe respiratory conditions may require a higher flow rate, so it's important to choose a concentrator that can meet their needs.
- 3. Noise level: Some concentrators can be guite loud, which can be bothersome for patients and their families. Look for a concentrator that operates quietly, especially if the patient will be using it at night.
- 4. Battery life: If the patient will be using a portable concentrator, make sure it has a long enough battery life to meet their needs. Some concentrators can run for several hours on a single charge, while others may require frequent recharging.
- 5. Price: Medical oxygen concentrators can vary widely in price, from a few hundred dollars for a basic model to several thousand dollar for a high-end unit. Make sure to choose a concentrator that fits within the patient's budget, while still meeting their needs.

Medical oxygen concentrators include Respironics, Inogen, and Invacare. It's important to consult with a healthcare professional to determine the best concentrator for the patient's individual needs.
