

Home Medical Oxygen Concentrator 1 - 7L/Min Wireless Remote Control Oxygen Concentrator

Our Product Introduction

for more products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: China
- Brand Name: MEDIRS
- Certification: CE,ISO13485,SGS ,FCC,RoHs
- Model Number: JY107W
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: OPP packing ,1pcs per Carton. Carton size:540*370*695mm,Gross Weight:21kgs.
- Delivery Time: 3-5 Working days
- Payment Terms: T/T, Western Union
- Supply Ability: 1000pcs

Product Specification

- Product Name: Home Use Oxygen Concentrator
- Oxygen Flow: 1-7L/min
- Instrument Classification: Class II
- Machine Size: 31*18*30cm
- Carton Size: 35.5*23*37cm
- Outlet Pressure: 8.5 PSI
- Highlight: Home Medical Oxygen Concentrator 7L/Min, Medical Oxygen Concentrator 7L/Min, Wireless Remote Control Oxygen Concentrator

Medical Oxygen Concentrators Are Redefining Respiratory Care At Home

Medical oxygen concentrators are playing an increasingly important role in redefining respiratory care at home. With the development of more compact and portable models, patients with respiratory illnesses can receive oxygen therapy in the comfort of their own homes, rather than being confined to hospitals or clinics. This not only provides greater convenience for patients, but also reduces the burden on healthcare facilities and allows for more efficient use of resources. Additionally, medical oxygen concentrators offer a cost-effective alternative to traditional oxygen delivery methods, making them more accessible to a wider range of patients.

Medical oxygen concentrators are medical devices that extract oxygen from the air and concentrate it to provide a higher level of oxygen to patients who have respiratory illnesses. They work by filtering ambient air through a series of molecular sieves and compressors, which removes nitrogen and other gases and concentrates the oxygen.

One of the main advantages of medical oxygen concentrators is that they can be used at home, which can improve patient outcomes and quality of life. Patients with chronic obstructive pulmonary disease (COPD), emphysema, and other respiratory illnesses can benefit from oxygen therapy to help them breathe more easily and improve their overall health. By using a medical oxygen concentrator at home, patients can avoid frequent hospital visits and maintain their independence.

Another advantage of medical oxygen concentrators is that they are more cost-effective than traditional oxygen delivery methods such as oxygen tanks or liquid oxygen. Medical oxygen concentrators require only a one-time investment and can last for several years with proper maintenance, whereas tanks and liquid oxygen require ongoing refills and can be much more expensive over time.

With the development of more compact and portable medical oxygen concentrators, patients can now take their therapy with them on the go. This has opened up new possibilities for patients who want to travel or maintain an active lifestyle while receiving oxygen therapy.

Medical oxygen concentrators are a valuable tool in the treatment of respiratory illnesses and are helping to redefine respiratory care at home. They offer patients greater convenience, independence, and cost-effectiveness, while also reducing the burden on healthcare facilities.

Wire-less Remote Control

Portable and steady in your hand

Power on/off

Timing +/-

Smart wireless
remote control

HD large screen voice broadcast function

Big fonts, big buttons, backlit display, easy for elders to use.
