Product Description

DVOT(3 IN ONE) SARS-Cov-2/InfluenzaA+B Antigen ComboTest Kit, Disposable At Home Antigen Test Kit

Product Description:

Our Antibody Rapid Test Kit detects the presence of antibodies produced by the body in response to the virus. This test is best used for individuals who have been symptomatic or have had exposure to someone with the virus. With an accuracy rate of 98%, our test kits will provide reliable results and help individuals with a better understanding of their current health status.

All of our test kits are rapid test kits, which means they can provide results in just 15 minutes. This feature makes them highly convenient and efficient for medical professionals who need quick results to properly diagnose and treat patients. Additionally, our test kits are disposable, which ensures that there is no risk of contamination or the spread of the virus.

Our Medical Diagnostic Test Kits are an essential tool in the fight against the virus. They provide reliable and accurate results in just 15 minutes, making them an ideal option for medical professionals and individuals alike. Order your test kits today and stay ahead of the virus.

Our Product Introduction

Technical Parameters:

Product Attribute	Value
Type	Rapid Test Kit
Test Time	15 Minutes
Time Of Use	Disposable
Certifications	CE,ISO
Result Time	15 Minutes To Get
Accuracy	98%
Keyword	Antigen Rapid Test

Advantages:

- Qualitative detection of SARS-CoV-2, Influenza A/B and RSV in the nose
- Cover your winter related respiratory viruses in only one test
- Distinguish your positive result(s) at one glance High accuracy, cost-effective and easy to use
- COVID: reliable with Alpha, Delta & Omicron variants, BA4, BA5, CH.1.1, and EG.5.

The SARS-Cov-2/InfluenzaA+B Antigen Combo Test is intended for use in hospitals and clinics, schools and colleges, laboratories, workplaces and travelers.

Steps to use the product:

Prepare the test kit:

Remove all necessary test kits from the box, including swabs, iodine solution (which may be used for sterilization or reaction), test tubes (for sample collection), and any other aids that may be needed.

Collecting the Sample:

Use a swab to collect a sample by gently rubbing the swab over a designated body part (e.g., mouth, nose, or skin, etc., according to the product instructions) as instructed in step 1, Swabbing. Ensure that the swab makes full contact and absorbs the sample.

Process the sample:

Proceed to step "2." This step may involve placing the collected sample into a test tube and mixing it with the solution inside.

Wait and check results:

After the sample has been processed, place the test card in a stable position, drop the solution vertically at 90° to the indicated position and wait for 15 minutes. During the waiting period, please do not shake or touch the test card, so as not to affect the test results.

Read the results:

At the end of the waiting time, check and read the results as described in the product instructions.
