Technical Parameters:

Certifications:	CE, ISO
Time Of Use:	Disposable
Keyword:	Antigen Rapid Test
Accuracy:	98%
Type:	Rapid Test Kit
Result Time:	15 Minutes To Get
Test Time:	15 Minutes

Applications:

The DOVT 3 IN 1 Rapid Test Kit is manufactured in China and bears the CE and ISO certifications. This ensures that the product meets the highest quality standards and is reliable and safe to use. The kit is a type of Rapid Test Kit, which means that it is designed to be used once and then discarded, making it a disposable product.

The DOVT 3 IN 1 Rapid Test Kit is primarily used for the diagnosis of Covid 19. It is a highly accurate and sensitive test that can detect the presence of the virus in the human body. The kit is easy to use and requires no special training or equipment. The test is performed by collecting a nasal swab sample from the patient and then inserting the swab into the test kit. The result is obtained in just 15 minutes, which makes it a quick and convenient way to get tested for Covid 19.

The DOVT 3 IN 1 Rapid Test Kit is suitable for use in a variety of settings, including hospitals, clinics, and laboratories. It is also an ideal choice for home testing kits, allowing individuals to test themselves for Covid 19 in the comfort of their own homes. This Antigen Rapid Self Test Kit is particularly useful in situations where rapid results are needed, such as in airports, schools, and workplaces.

In conclusion, the DOVT 3 IN 1 Rapid Test Kit is a highly accurate and reliable medical diagnostic device that can be used for the diagnosis of Covid 19. It is a type of Rapid Test Kit that is designed to be used once and then discarded, making it a disposable product. The kit is easy to use and requires no special training or equipment, making it an ideal choice for home testing kits. With its quick result time and high accuracy, the DOVT 3 IN 1 Rapid Test Kit is an essential tool in the fight against Covid 19.

Support and Services:

Advantages:

Qualitative detection of SARS-CoV-2, Influenza A/B and RSV in the nose

Cover your winter related respiratory viruses in only one test

Distinguish your positive result(s) at one glance High accuracy, cost-effective and easy to use

COVID: reliable with Alpha, Delta & Omicron variants, BA4, BA5, CH.1.1, and EG.5.

The SARS-Cov-2/InfluenzaA+B Antigen Combo Test is intended for use in hospitals and clinics, schools and colleges, laboratories, workplaces and travelers.

Steps to use the product:

Prepare the test kit:

Remove all necessary test kits from the box, including swabs, iodine solution (which may be used for sterilization or reaction), test tubes (for sample collection), and any other aids that may be needed.

Collecting the Sample:

Use a swab to collect a sample by gently rubbing the swab over a designated body part (e.g., mouth, nose, or skin, etc., according to the product instructions) as instructed in step 1, Swabbing. Ensure that the swab makes full contact and absorbs the sample.

Process the sample:

Proceed to step "2." This step may involve placing the collected sample into a test tube and mixing it with the solution inside.

Wait and check results:

After the sample has been processed, place the test card in a stable position, drop the solution vertically at 90° to the indicated position and wait for 15 minutes.

During the waiting period, please do not shake or touch the test card, so as not to affect the test results.

Read the results:

At the end of the waiting time, check and read the results as described in the product instructions.
