

HBOT Medical Oxygen Therapy Chamber 1.3ATA / Hyperbaric Pressure Chamber For Rehabilitation

Our Product Introduction

for more products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: SHENZHEN EMENG HEALTH
- Brand Name: O2EMENG
- Certification: CE/FDA/FC/ROHS/UKCA/SGS
- Model Number: EMS05
- Minimum Order Quantity: 1PC
- Price: \$5150
- Packaging Details: wooden packing
- Delivery Time: 15-20 work days
- Payment Terms: D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100PCS

Product Specification

- Machine CTN Size: 127*55*105cm
- Chamber CTN Size: 32*33*124cm
- Total Weight: 83kgs
- Oxygen Concentration: $\geq 90\%$ (can Be Set)
- Working Pressure: 1.3ATA
- Pressure Reduction Time: 5-10 Mins
- Highlight: 1.3ATA Hyperbaric Oxygen Chamber, Medical Oxygen Therapy Chamber, Rehabilitation Hyperbaric Oxygen Chamber

Product Description

HBOT Medical Oxygen Therapy Chamber 1.3ATA / Hyperbaric Pressure Chamber For Rehabilitation

Product Description:

The EMS05 model is O2EMENG's flagship product, integrating advanced technology designed to provide the best user experience. Its new hyperbaric oxygen equipment is an intelligent all-in-one machine that combines oxygen equipment, aerodynamic system and air cooler, easily operated by one button, saving time and labor. It is widely used in healthcare, home as well as beauty salons.

O2EMENG Hyperbaric Oxygen Chamber adopts advanced technology and design, which can ensure the safety during the treatment process. Meanwhile, hyperbaric oxygen therapy, as a non-invasive physical therapy method, has significant therapeutic effects. Compared with other treatment methods, hyperbaric oxygen therapy may have lower cost and higher cost-effectiveness. O2EMENG hyperbaric oxygen chamber may further reduce the cost of use and improve the economic benefits by optimizing the design and production process. At the same time, this oxygen chamber is suitable for people who are easy to be fatigued, work late at night and overtime, insomnia patients, ambiguous skin care people, and sub-healthy people, etc. It can increase the oxygen in the body, blood oxygen saturation, and the diffusion distance of oxygen in the body

All in all, our hyperbaric chamber is a top-quality product with excellent performance and reliability. Its compact size allows it to be installed in many medical facilities without taking up too much space. It is an essential piece of equipment for any hospital or clinic that provides high-quality rehabilitation therapy supplies. It produces at least 90% oxygen concentration and is one of the best hyperbaric chambers on the market for a great experience. Buy it today and experience the benefits of hyperbaric oxygen therapy.

Applications:

Brand Name: O2EMENG

Model Number: EMS05

Place of Origin: SHENZHEN EMENG HEALTH

Oxygen concentration: $\geq 90\%$ (can be set)

Machine CTN size: 127*55*105cm

Properties: Rehabilitation Therapy Supplies

Total Weight: 83kgs

HBOT chambers are used in a variety of medical settings to treat several conditions. Here are a few examples of product application occasions and scenarios:

Chronic Wounds:

HBOT chambers can be used to treat chronic wounds such as diabetic foot ulcers, venous leg ulcers, and pressure sores. The high-pressure oxygen chamber increases blood flow and helps to promote the growth of new blood vessels which can aid in the healing process.

Carbon Monoxide Poisoning:

HBOT chambers can be used to treat carbon monoxide poisoning. Carbon monoxide is a toxic gas that can cause headaches, dizziness, and nausea. Breathing in pure oxygen in a pressurized environment can help to remove the carbon monoxide from the body and reduce the effects of poisoning.

Autism:

HBOT chambers can be used to treat autism. Studies have shown that high-pressure oxygen therapy can help to reduce symptoms of autism such as repetitive behaviors and social withdrawal. The therapy can also improve cognitive function and language skills.

Brain Injury:

HBOT chambers can be used to treat brain injuries such as concussions and traumatic brain injuries. The high-pressure oxygen environment can help to reduce swelling in the brain and increase blood flow which aids in the healing process.

Stroke:

HBOT chambers can be used to treat stroke patients. The therapy can help to reduce brain damage caused by lack of oxygen during a stroke. It can also aid in the recovery process and improve neurological function.

In conclusion, the O2EMENG EMS05 Hyperbaric Oxygen Chamber is a versatile medical device that can be used to treat a wide range of conditions. Its portability and user-friendly features make it a valuable asset to any medical facility.

Support and Services:

1.Demand customization: according to your use environment and expectations, recommend the optimal core products and life aesthetics composition scheme.

2.Exclusive design: the advanced technology team and the top design team jointly, from the size and color material matching, the actual program customization landing.

3. Craftsmanship Manufacturing: The core components and other materials of hyperbaric chamber series products are manufactured in aerospace material factories.

4. Lifetime maintenance: provide perfect professional after-sales service guarantee

Our Hyperbaric Oxygen Chamber product comes with comprehensive technical support and services to ensure optimal performance and customer satisfaction. Our team of experienced technicians and engineers are available to assist with installation, maintenance, and troubleshooting of the product.

In addition, we offer training sessions for customers to learn how to properly operate and maintain the Hyperbaric Oxygen Chamber. This includes training on safety protocols and best practices for usage.

Our technical support and services also include regular maintenance and repair services to keep the product functioning at its best. We offer both on-site and remote support options to better serve our customers.

If you have any questions or concerns about our technical support and services for the Hyperbaric Oxygen Chamber, please do not hesitate to contact us.

APPLICATION OF HYPERBARIC OXYGEN THERAPY

Beauty & wellness:

HBOT helps rejuvenate your skin. During a hyperbaric oxygen therapy session inside a pressurized chamber, the body receives pure oxygen at higher atmospheric pressure to boost the flow of oxygen into the circulatory systems.

Sports:

HBOT for professional sports has become one of the most effective methods for athlete recovery. Supplementing oxygen intake at higher atmospheric pressure inside a hyperbaric chamber is known to naturally accelerate healing times to treat sports injuries and allow injured athletes to recover faster and reduce the risk of re-injury.

Wounds and burns:

Healing Wounds need oxygen to heal naturally and hyperbaric oxygen therapy has been successfully used as complementary therapy for wound healing. Used as complementary treatment, Hyperbaric Oxygen Therapy can help decrease mortality and reduce the need for surgery for mild to severely burned patients.

Anti-aging:

Hyperbaric Oxygen Therapy for Elderly Patients Inside the hyperbaric chamber, a patient will absorb oxygen close to four times the normal breathing conditions. Oxygen controls most of the body's processes, including the immune system. Lack of oxygen can lead to a vulnerable immune response, increased fatigue and eventually hypoxia.

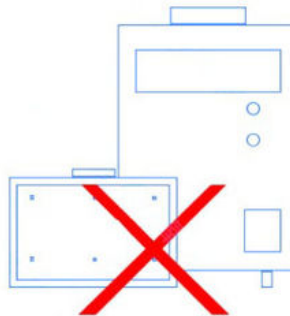

INTEGRATION OF SUPERCHARGING AND OXYGENATION

Overturn the complexity of traditional household
