

Disposable FCoV Antigen Test for Cats Easy and Fast Protects Health in 8 Minutes

Our Product Introduction

for more products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: China
- Brand Name: DVOT
- Certification: CE/ISO
- Model Number: FCoV
- Minimum Order Quantity: 360 test
- Price: 1.3USD
- Packaging Details: OPP Packing
- Delivery Time: 15-20 work days
- Payment Terms: D/P, T/T, Western Union, MoneyGram
- Supply Ability: 1000000pcs

Product Specification

- Accuracy: 99%
- Certifications: CE ISO
- Test Time: 8mins
- Time Of Use: Disposable
- Keyword: Antigen Rapid Test
- Highlight: **Disposable FCoV Antigen Test, Fast FCoV Antigen Test, 8 Minutes FCoV Antigen Test**

Product Description

Feline Coronavirus (FCoV) Antigen Test, easy to use and protects the health of cats.

Product Description:

What is FCoV?

FCoV is a virus that is widely spread in felines and it belongs to the coronavirus family. Most FCoV infections present as asymptomatic intestinal infections, but in some cases FCoV may mutate into feline infectious peritonitis virus (FIPV), leading to serious systemic diseases such as feline infectious peritonitis (FIP), a highly fatal disease. Feline infectious peritonitis virus is transmitted through the feces of infected cats. Feline Coronavirus usually infects other cats via the fecal-oral route.

The Feline Coronavirus (FCoV) Antigen Test is a highly accurate test designed to quickly identify the presence of feline coronavirus (FCoV) antigen in cats.

Applications:

The easy-to-understand design makes it easy for users to complete the testing process without specialized training. The product obtains results in less than 8 minutes with intuitive and clear test results. A simple color change or indicator line can determine if your cat is infected with feline FCoV, making it easy to take prompt action.

In addition, the product has a shelf life of 24 months and can be stored at (2-30 °C) without special storage conditions, making it easy for home use and long-term storage. Ensuring accurate and reliable testing, it is commonly used in pet hospitals and clinics, pet owners' homes, pet boarding centers, etc. All reagents have been rigorously screened and tested to ensure they are safe and harmless to cats and operators, allowing you to care for your cat with peace of mind.

Product Name	Feline Calicivirus Antigen Test
Specimen	Eye/Ear Secretion
Time to Result	8mins
Shelf Life/Validity	24months
Storage	Between 2-30°C
Accuracy	99%

Support and Services:

Our medical diagnostic test kits are designed for accuracy and ease of use. We offer technical support services to assist with any questions or issues that may arise during the testing process.

Our goal is to provide our customers with the highest level of support and service to ensure successful testing outcomes.

Feline Coronavirus Antigen Test

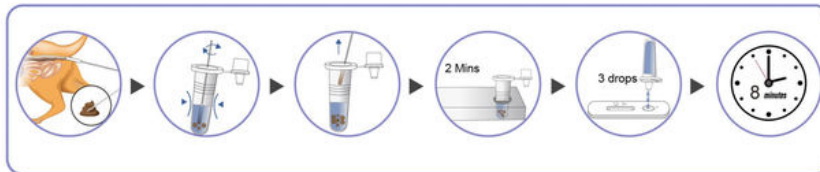

Feline coronavirus (FCoV) is a sense-stranded RNA virus that is infectious to cats globally. It has two different forms: the FECV (feline enteric coronavirus) that infects the intestines and the FIPV (feline infectious peritonitis virus) that causes the disease feline infectious peritonitis (FIP). Feline coronavirus is typically shed in feces by infected cats and transmitted by the fecal-oral route to other cats.

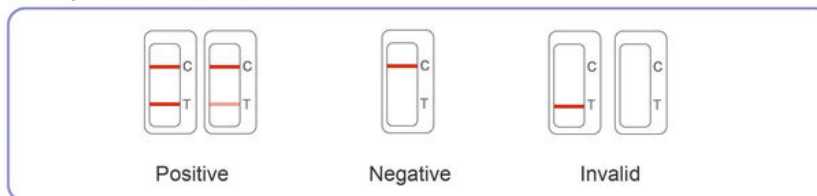

This product does not require any additional equipment and is used for in-vitro qualitative screening for Feline Coronavirus antigen in cat feces. This product is used for self-test.

Test steps are as follows

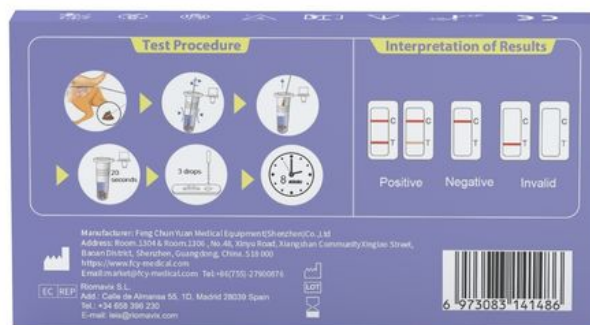

Interpretation of Results

Ordering Information

Description	SPECIMEN	Shelf life	Storage	Pack size
FCoV Ag	Feces	24 months	2-30°C	1/5/25 test(s)/kit
