

DOVT Canine And Feline Anaplasma Antibody ANA Ab Test Kit Easy To Use And Reliable

Basic Information

- Place of Origin: China
- Brand Name: DVOT
- Certification: CE/ISO
- Model Number: ANA Ab
- Minimum Order Quantity: 360 test
- Price: 1.63USD
- Packaging Details: OPP Packing
- Delivery Time: 15-20 work days
- Payment Terms: D/P, T/T, Western Union, MoneyGram
- Supply Ability: 1000000pcs

Product Specification

- Accuracy: 99%
- Certifications: CE ISO
- Test Time: 8mins
- Time Of Use: Disposable
- Keyword: Antigen Rapid Test
- Highlight: Anaplasma Antibody Test Kit, Feline ANA Ab Test Kit, Canine ANA Ab Test Kit

Product Description

Product Description:

DOVT Canine And Feline Anaplasma Antibody (ANA Ab) Test Kit is a rapid diagnostic kit designed for the detection of Anaplasma Antibody. It is an intuitive, rapid, and qualitative test for the detection of eosinophil monoclonal antibodies and/or plate monoclonal antibodies in canine whole blood, serum, or plasma. It is a visual, rapid and qualitative test for the detection of eosinophil monoclonal antibodies and/or plate monoclonal antibodies in canine whole blood, serum or plasma. It provides veterinarians and pet owners with rapid and accurate diagnostic results.

Plasma Free Antibody Detection Kit This test is for veterinary use only. Gram-negative belongs to bacteria as described above. Anaplasma sp. is an obligate intracellular parasite that causes a disease known as anaplasmosis in humans, dogs, and some other animals. The disease is transmitted by a variety of tick vectors and has a worldwide distribution.

Applications:

Results are available in less than 8 minutes and are intuitively clear. A simple color change or indicator line can determine if your cat/dog is infected with ANA, allowing you to take action easily and quickly.

In addition, the product has a shelf life of 24 months and can be stored at (2-30°C) without special storage conditions, making it convenient for home use and long-term storage. It ensures accurate and reliable testing and is commonly used in pet hospitals and clinics, etc. All reagents are strictly screened and tested to ensure that they are safe and harmless to cats/dogs and operators, guarding the health of pets.

Product Name	Canine And Feline Anaplasma Antibody (ANA Ab) Test Kit
Specimen	whole serum or blood plasma +EDTA Cat Secretions
Time to Result	8mins
Shelf Life/Validity	24months
Storage	Between 2-30°C
Accuracy	99%

Support and Services:

Our medical diagnostic test kits are designed for accuracy and ease of use. We offer technical support services to assist with any questions or issues that may arise during the testing process.

Our goal is to provide our customers with the highest level of support and service to ensure successful testing outcomes.

Steps to use:

- 1, Collection of samples: Collect whole serum or blood plasma +EDTA samples from cats/dog.
- 2, Place the test card horizontally and drop the collected sample vertically into the specified position.
- 3, Drop a drop of solution
4. Wait for 8 minutes for the sample to fully react and then read the color change on the test card to determine whether the cat/dog is infected with ANA Ag.

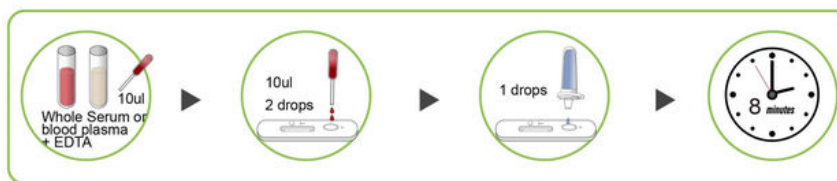

Canine and Feline Anaplasma Antibody Test

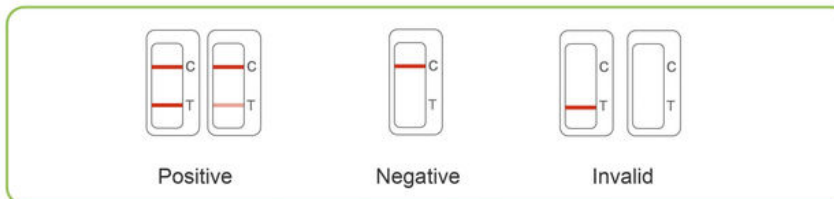

The Anaplasma Antibody Test Kit is a visual rapid test for the qualitative detection of antibodies to *A. phagocytophilum* and/or *A. platys* in canine whole blood, serum or plasma. This test is for veterinary use only. Gram negative bacteria belonging to the above *Anaplasma* spp. are obligatory intracellular parasites and cause the disease known as Anaplasmosis in man, dogs and some other animals. This disease is transmitted by a variety of tick vectors and has a world-wide distribution.

Test steps are as follows

Interpretation of Results
