

High Accuracy FCHW Heartworm Disease Rapid Test Kit for Cats CE and ISO Certified

Our Product Introduction

for more products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: China
- Brand Name: DVOT
- Certification: CE/ISO
- Model Number: FCHW
- Minimum Order Quantity: 360 test
- Price: 1.3USD
- Packaging Details: OPP Packing
- Delivery Time: 15-20 work days
- Payment Terms: D/P, T/T, Western Union, MoneyGram
- Supply Ability: 1000000pcs

Product Specification

- Accuracy: 99%
- Certifications: CE ISO
- Test Time: 8mins
- Time Of Use: Disposable
- Keyword: Antigen Rapid Test
- Highlight: **FCHW Heartworm Disease Rapid Test Kit, Rapid Test Kit for Cats**

Product Description

Product Description:

FCHW (Feline Heartworm) is a parasite known as the feline heartworm (*Dirofilaria immitis*). This parasite primarily parasitizes the heart, pulmonary arteries and their branches in cats and is transmitted by mosquito bites. Cats infected with heartworm may show signs of tinnitus, weak pulse, intermittent or heart murmur, weight loss and loss of appetite.

The DOVT Feline Heartworm Antigen Test is a lateral flow immunoassay for the qualitative detection of feline heartworm (FHW)-specific antigens in whole blood, serum or plasma samples. The test can be used to identify FHW infection and is an important tool for veterinarians in the diagnosis of feline heartworm disease.

Applications:

The easy-to-understand design allows users to complete the testing process without specialized training. Results are available in less than 8 minutes and are intuitively clear. A simple color change or indicator line will determine if your cat is infected with FCHW, making it easy to take quick action.

In addition, the product has a shelf life of 24 months and can be stored at (2-30°C) without special storage conditions, making it convenient for home use and long-term storage. It ensures accurate and reliable testing and is commonly used in pet hospitals and clinics, pet owners' homes, pet boarding centers, etc. All reagents are rigorously screened and tested to ensure that they are safe and harmless to cats and operators, giving you peace of mind when caring for your cat.

Product Name	Feline Heartworm Antigen Test
Specimen	whole serum or blood plasma +EDTA
Time to Result	8mins
Shelf Life/Validity	24months
Storage	Between 2-30°C
Accuracy	99%

Support and Services:

Our medical diagnostic test kits are designed for accuracy and ease of use. We offer technical support services to assist with any questions or issues that may arise during the testing process.

Our goal is to provide our customers with the highest level of support and service to ensure successful testing outcomes.

Steps to use:

- 1, Collection of samples: Collect whole serum or blood plasma +EDTA samples from cats.
- 2, Place the test card horizontally and drop the collected sample vertically into the specified position.
- 3, Drop a drop of solution
4. Wait for 8 minutes for the sample to fully react and then read the color change on the test card to determine whether the cat is infected with FCHW.

Feline Heartworm Antigen Test

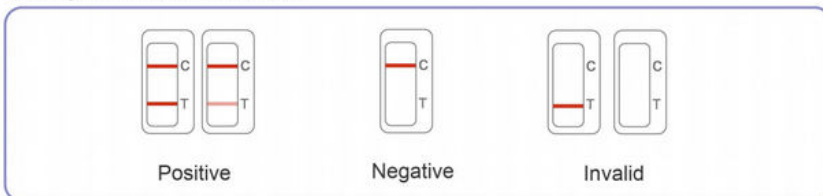

Feline Heartworm Antigen Rapid Test is a lateral flow immunoassay intended for the qualitative detection of specific antigen from feline heartworm (FHW) in whole blood, serum or plasma sample. The test is useful for determination of FHW infection. It is recommended to use when your cat has symptoms such as hyperpalpitations, weak pulse, intermittency or heart murmur.

Test steps are as follows

Interpretation of Results
