SGS Certified Oxygen Generator Machine for Medical and Therapeutic Applications

Our Product Introduction

For products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: China
- Brand Name: Tylenolmed
- Certification: CE, ISO13485, SGS, FCC, RoHs
- Model Number: ND-ZY10SL
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: OPP packing ,1pcs per Carton. Carton size:540*370*695mm,Gross Weight:21kgs.
- Delivery Time: 7-10 Working days
- Payment Terms: T/T, Western Union
- Supply Ability: 1000pcs

Product Specification

- Product Category: Medical Oxygen Concentrator
- Color: White, Black
- Noise Level: Less Than 63 DB
- Power Consumption: 1500w
- Highlight: **SGS certified oxygen generator, medical oxygen concentrator machine, therapeutic oxygen generator with warranty**

Product Description

Product Description:

The Medical Oxygen Concentrator is a vital device designed for medical use, providing a reliable source of concentrated oxygen for individuals with respiratory conditions. This essential equipment comes in two stylish chamber colors, White and Black, allowing users to choose the option that best suits their preferences or healthcare environment.

With a robust supply ability of 1000pcs, the Oxygen Concentrator ensures a consistent availability of oxygen therapy for patients in need. Its superior functionality and efficiency make it a dependable choice for medical facilities, caregivers, and individuals requiring respiratory support.

The Oxygen Concentrator operates at an input power of 700VA, delivering optimal performance while maintaining energy efficiency. Its model number, ND-ZY10SL, signifies its unique identification within the range of medical oxygen equipment, ensuring easy recognition and compatibility with related accessories.

Available in classic White and sleek Black colors, this Oxygen Concentrator is not only a practical oxygen concentrating device but also a stylish addition to any medical setting. The dual-color options cater to diverse preferences and allow for seamless integration into different healthcare environments.

Features:

Product Name: Medical Oxygen Concentrator

Product Category: Medical Oxygen Concentrator

Color: White, Black

Supply Ability: 1000pcs

Voltage: 110V/50Hz; 220V/50Hz

Usage: Medical/Therapeutic

Technical Parameters:

Model Number	ND-ZY10SL
Usage	Medical/Therapeutic
Certification	CE, ISO13485, SGS, FCC, RoHs
Brand Name	Tylenolmed
Supply Ability	1000pcs
Cabin Weight	1000KGS
Voltage	110V/50Hz; 220V/50Hz
Color	White, Black
Function	Hyperbaric Oxygen Therapy
Product Name	Powerful Medical Oxygen Generator with 10Liter/Min Flow Rate and 1000KGS Cabin Weight

Applications:

Tylenolmed's Medical Oxygen Concentrator (Model: ND-ZY10SL) is a high-quality oxygen producing equipment designed to provide a reliable source of oxygen for various medical applications. This Oxygen Concentrating Device is suitable for a wide range of occasions and scenarios due to its exceptional performance and features.

With certifications including CE, ISO13485, SGS, FCC, and RoHs, this product ensures compliance with international standards for safety and quality. Originating from China, this Oxygen Concentrating Device offers a cost-effective solution with negotiable pricing and minimum order quantity.

Customers can benefit from flexible payment terms such as T/T and Western Union, making it convenient to acquire this essential medical device. With a supply ability of 1000pcs and a short delivery time of 7-10 working days, the Tylenolmed Oxygen Concentrator is readily available to meet various demands.

The product comes in secure packaging details with OPP packing and one piece per carton. The carton size is 540*370*695mm, with a gross weight of 21kgs, ensuring safe transportation and handling.

Powered by 700VA input power, this Oxygen Concentrating Device offers a flow rate of 10 liters per minute, making it suitable for different medical requirements. Despite its powerful performance, the device has a cabin weight of 1000KGS, ensuring portability and ease of use. Available in white or black chamber color options, the Tylenolmed Medical Oxygen Concentrator is versatile and can be seamlessly integrated into various medical settings. Whether used in hospitals, clinics, home care settings, or emergency situations, this device guarantees reliable and continuous oxygen supply.

Support and Services:

Our Product Technical Support and Services for the Medical Oxygen Concentrator include:

- Troubleshooting assistance for any product-related issues
- Repair and maintenance services to ensure optimal performance

- Product training and educational resources for users and healthcare professionals
- Access to product manuals, guides, and instructional videos
- Continuous product monitoring and updates to enhance functionality

Packing and Shipping:

Product Packaging:

The Medical Oxygen Concentrator is carefully packaged to ensure safe delivery. It is securely wrapped and placed in a sturdy cardboard box with protective foam inserts to prevent any damage during transit. The packaging includes handling instructions and product information for easy reference.

Shipping:

Orders for the Medical Oxygen Concentrator are processed promptly and shipped using a reliable courier service. The package is tracked to provide real-time updates on the delivery status. Customers can expect their product to arrive in a timely manner, ready to use upon unpacking.

FAQ:

Q: What is the brand name of this Medical Oxygen Concentrator?

A: The brand name is Tylenolmed.

Q: What is the model number of this Medical Oxygen Concentrator?

A: The model number is ND-ZY10SL.

Q: What certifications does this Medical Oxygen Concentrator have?

A: It is certified with CE, ISO13485, SGS, FCC, and RoHs.

Q: Where is this Medical Oxygen Concentrator manufactured?

A: This product is manufactured in China.

Q: What are the payment terms accepted for purchasing this Medical Oxygen Concentrator?

A: The accepted payment terms are T/T and Western Union.

CHAMBER CAPSULE DESCRIPTION

1. Automatic digital display real-time temperature, humidity, oxygen purity and pressure.
2. Rotary timer system, use of time can be pressed in advance Multiple noise reduction technology.
3. Excellent Silence performance, the noise is $\leq 63\text{dB}$. Offer you a peaceful experience environment.
4. Double pressure relief device Spiral step less super smooth rotary valve. Spiral ergonomic hand-held design. Pressure relief is smoother and more convenient. Internal and external two-way integrated polycarbonate valve. One valve, two-way operation.
5. Automatic pressurize relief valves
Two automatic high precision constant pressure valve. Ensure the product is safe and effective by Aluminum alloy steel, high hardness, wear resistance.
6. Communicating system.
Intercom telephone is convenient for users to talk with operator outside.
7. Machine start-up protection system.
The chamber only can be turned on when the chamber door is completely closed, avoiding the danger of the door being left unlocked.
8. Automatic pressurize and depressurize system.
Based on the principle of "Cylinder (engine)" , Pressurize automatically after the door is completely closed.
9. Made by Aluminum alloy steel; With environmental spray paint;
Strong weight bearing capacity, Durable and wear-resistant; non-deformable; long lifespan.
10. In case of unexpected power failure, the door can be opened by emergency safety from inside the chamber.

WHY ARE MORE AND MORE PEOPLE CHOOSING HYPERBARIC OXYGEN CHAMBERS?

In some parts of the body, the capillaries are so narrow that blood cells cannot pass through them, bound oxygen cannot reach them, and they can only rely on dissolved oxygen. The oxygen generator has little change in the dissolved oxygen in the blood, which is also the reason why the ordinary oxygen absorption effect in the plateau area is general.

CONCLUSION

It is more feasible to increase the dissolved oxygen in the blood.
The hyperbaric oxygen chamber can maintain the oxygen partial pressure within a safe and effective range by flexibly adjusting the oxygen concentration or pressure, and gently and effectively improve the oxygen delivery to tissues and organs by increasing dissolved oxygen.

HARD TYPE HYPERBARIC OXYGEN CHAMBER

Innovative technology, quality assurance

The cabin door is made of aviation PC material

Multiple safety technologies
One-button pressure relief protection system during power outage

AI intelligent voice control system

FAQ

1. How does hyperbarics work?

Hyperbarics is a technology in which the air pressure in the environment is increased. When a person's body is placed in a more pressure environment, it absorbs more oxygen molecules per volume of compressed air.

The body normally transports oxygen via the hemoglobin of the red blood cells. By increasing the air pressure, oxygen is then driven into the body's fluids, allowing a super-saturation of tissues and organs with oxygen. The increased pressure infuses the body with oxygen, even reaching injuries with damaged circulation.

2. What are the health benefits of hyperbaric oxygen chambers?

Studies have shown that hyperbaric oxygen chambers can treat hypoxic diseases, relieve fatigue, delay aging, prevent cardiovascular disease, improve sleep quality, accelerated wound repair and enhance immunity. We have customers serviced shows hyperbaric oxygen therapy makes very positive results.

3. How long is the treatment?

Usually, we recommend our clients receive the HBOT therapy 5-6 sessions per week, 60-90mins per session. Using frequency or duration can be adjusted according to individual circumstances.

4. Is HBOT safe?

Hyperbaric oxygen therapy is prescribed by a physician and performed under medical supervision. Although there are minor risks like all medical treatments, overall hyperbaric oxygen therapy is extremely safe.

5. Is there anyone who can not use our chamber?

Pregnant ladies, patients who catch a cold or Flu, or those who have rhinitis or otitis media are not recommended to use the chamber.

6. How do you feel inside a hyperbaric oxygen chamber?

When lying in the oxygen chamber, you will feel comfortable and at ease. Also, You may feel a little squeezing of the ears because of the pressure. It is quite normal and can be relieved by chewing or swallowing.

7. After bought the chamber, do I need to by any other things?

No, the price of our chamber includes the chamber capsule, all machines, namely the air compressor, oxygen concentrator, air cooler, and accessories like frame, tubes, etc, so you don't have to buy anything else.

8. Is it complex to install the chamber or change the filter?

Of course not, we will provide you with a video to show you how to install the chamber and change the filter.

We also support online services to help you with all the issues, so don't worry.

9. What is the general time warranty expected for ZHIKANG oxygen chambers?

We will provide one-year warranty and lifelong after-sales services.

If any quality problem/fault in material/design is under correct operation within one year,

If it's easy to fix, we will send new components for free and teach you how to repair them.

(Even after the one-year warranty period, you can also contact us freely and we will be glad to help you.)
