White Medical Oxygen Concentrator 1500W 28% 32% Chamber Oxygen Concentration for Oxygen Therapy and Treatment

Our Product Introduction

For products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: China
- Brand Name: Tylenolmed
- Certification: CE,ISO13485,SGS ,FCC,RoHs
- Model Number: ND-ZY10SL
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: OPP packing ,1pcs per Carton. Carton size:540*370*695mm,Gross Weight:21kgs.
- Delivery Time: 7-10 Working days
- Payment Terms: T/T, Western Union
- Supply Ability: 1000pcs

Product Specification

- Voltage: 110V/50Hz; 220V/50Hz
- Color: White, Black
- Rating: 1500W
- Input Power: 700VA
- Usage: Medical/Therapeutic
- Function: Hyperbaric Oxygen Therapy
- Noise Level: Less Than 63 DB
- Power Consumption: 1500w
- Highlight: **white medical oxygen concentrator 1500W , oxygen concentrator for oxygen therapy , medical oxygen concentrator with 28-32% concentration**

Product Description

Product Description:

The Powerful Medical Oxygen Generator offered by Tylenolmed is a top-of-the-line Oxygen Concentrator for Medical Use designed to provide high-quality oxygen therapy. With an impressive flow rate of 10 liters per minute, this Continuous Flow Oxygen Generator is perfect for individuals requiring a consistent and reliable source of oxygen.

With a maximum cabin weight of 1000KGS, this oxygen concentrator is sturdy and durable, making it suitable for various medical settings. Whether used in hospitals, clinics, or even at home, this Portable Oxygen Maker ensures a steady supply of oxygen for patients in need.

Equipped with advanced technology and precision engineering, the Tylenolmed Oxygen Concentrator is a reliable and efficient solution for Hyperbaric Oxygen Therapy. This innovative function allows for the delivery of high concentrations of oxygen to patients, promoting faster healing and improved overall well-being.

As a leading brand in the medical equipment industry, Tylenolmed guarantees the quality and performance of this Medical Oxygen Concentrator. With a supply ability of 1000pcs, healthcare providers can rely on the availability of this essential device to meet the needs of their patients.

Whether used for long-term oxygen therapy or as a backup oxygen source in emergency situations, the Tylenolmed Powerful Medical Oxygen Generator is a versatile and essential tool for healthcare professionals. Its user-friendly design and robust construction make it a valuable asset in any medical facility.

Invest in the best with the Tylenolmed Oxygen Concentrator - the ultimate choice for high-flow oxygen therapy and Hyperbaric Oxygen Treatment. Ensure a steady and reliable source of oxygen for your patients with this top-of-the-line Continuous Flow Oxygen Generator.

Features:

Product Name: Medical Oxygen Concentrator

Power Consumption: 1500w

Color: White, Black

Supply Ability: 1000pcs

Brand Name: Tylenolmed

Noise Level: Less Than 63 DB

Technical Parameters:

Color	White, Black
Power Consumption	1500w
Input Power	700VA
Supply Ability	1000pcs
Flow Rate	10Liter/Min
Chamber Colour	White / Black
Product Name	Powerful Medical Oxygen Generator with 10Liter/Min Flow Rate and 1000KGS Cabin Weight
Rating	1500W
Certification	CE, ISO13485, SGS, FCC, RoHs
Cabin Weight	1000KGS

Applications:

Tylenolmed's Medical Oxygen Concentrator (Model: ND-ZY10SL) is a powerful oxygen-producing equipment specifically designed for medical use. With certifications including CE, ISO13485, SGS, FCC, and RoHs, this product guarantees high quality and reliability. Originating from China, the Oxygen Concentrator is available for purchase with negotiable minimum order quantity and price, along with flexible payment terms such as T/T and Western Union.

Capable of producing oxygen at a flow rate of 10 liters per minute, this Medical Oxygen Concentrator is an essential tool in various healthcare settings. Its chamber oxygen concentration ranges from 28% to 32%, ensuring the delivery of optimal oxygen levels to patients. Additionally, the product is designed to operate quietly with a noise level of less than 63 dB, creating a peaceful environment for both patients and healthcare professionals.

Whether in hospitals, clinics, nursing homes, or home care settings, the Tylenolmed Oxygen Concentrator is suitable for a wide range of medical application occasions. It provides a steady and reliable source of oxygen for patients with respiratory conditions or those in need of respiratory support. The product's efficient oxygen production, combined with its portability and ease of use, makes it a versatile solution for various medical scenarios.

With a supply ability of 1000 units, this Oxygen Concentrator can meet the demands of healthcare facilities of all sizes. Orders can be delivered within 7-10 working days, packaged securely in OPP packing with each unit housed in a carton measuring 540*370*695mm and weighing 21kgs. The product's compact design and manageable weight of 1000kgs make it suitable for deployment in different healthcare settings without taking up excessive space.

Support and Services:

Our Product Technical Support and Services for the Medical Oxygen Concentrator include:

- Troubleshooting assistance for any operational issues
- Guidance on proper maintenance and cleaning procedures
- Repair services for any mechanical or technical problems
- Product training and educational resources for users and caregivers
- Continuous product updates and enhancements to ensure optimal performance

Packing and Shipping:

Product Packaging and Shipping:

The Medical Oxygen Concentrator is carefully packaged to ensure safe delivery to our customers. Each unit is securely wrapped and placed in a sturdy box to prevent any damage during transit. Additionally, the product is labeled with handling instructions and fragile stickers to alert shipping handlers.

For shipping, we partner with reliable courier services to guarantee timely and efficient delivery. Customers can track their orders and receive notifications to stay informed about the shipping status. We prioritize the safety and prompt delivery of our Medical Oxygen Concentrator to provide a seamless shopping experience for our valued customers.

FAQ:

Q1: What is the brand name of this Medical Oxygen Concentrator?

A1: The brand name is Tylenolmed.

Q2: What is the model number of this Oxygen Concentrator?

A2: The model number is ND-ZY10SL.

Q3: What certifications does this Oxygen Concentrator have?

A3: It is certified with CE, ISO13485, SGS, FCC, and RoHs.

Q4: Where is this Medical Oxygen Concentrator manufactured?

A4: It is manufactured in China.

Q5: What are the payment terms and supply ability for this product?

A5: The payment terms accepted are T/T and Western Union, while the supply ability is 1000pcs.

CHAMBER CAPSULE DESCRIPTION

1. Automatic digital display real-time temperature, humidity, oxygen purity and pressure.
2. Rotary timer system, use of time can be pressed in advance Multiple noise reduction technology.
3. Excellent Silence performance, the noise is $\leq 63\text{dB}$. Offer you a peaceful experience environment.
4. Double pressure relief device Spiral step less super smooth rotary valve. Spiral ergonomic hand-held design. Pressure relief is smoother and more convenient. Internal and external two-way integrated polycarbonate valve. One valve, two-way operation.
5. Automatic pressurize relief valves
Two automatic high precision constant pressure valve. Ensure the product is safe and effective by Aluminum alloy steel, high hardness, wear resistance.
6. Communicating system.
Intercom telephone is convenient for users to talk with operator outside.
7. Machine start-up protection system.
The chamber only can be turned on when the chamber door is completely closed, avoiding the danger of the door being left unlocked.
8. Automatic pressurize and depressurize system.
Based on the principle of "Cylinder (engine)" , Pressurize automatically after the door is completely closed.
9. Made by Aluminum alloy steel; With environmental spray paint;
Strong weight bearing capacity, Durable and wear-resistant; non-deformable; long lifespan.
10. In case of unexpected power failure, the door can be opened by emergency safety from inside the chamber.

WHY ARE MORE AND MORE PEOPLE CHOOSING HYPERBARIC OXYGEN CHAMBERS?

In some parts of the body, the capillaries are so narrow that blood cells cannot pass through them, bound oxygen cannot reach them, and they can only rely on dissolved oxygen. The oxygen generator has little change in the dissolved oxygen in the blood, which is also the reason why the ordinary oxygen absorption effect in the plateau area is general.

CONCLUSION

It is more feasible to increase the dissolved oxygen in the blood. The hyperbaric oxygen chamber can maintain the oxygen partial pressure within a safe and effective range by flexibly adjusting the oxygen concentration or pressure, and gently and effectively improve the oxygen delivery to tissues and organs by increasing dissolved oxygen.

HARD TYPE HYPERBARIC OXYGEN CHAMBER

Innovative technology, quality assurance

The cabin door is made of aviation PC material

Multiple safety technologies
One-button pressure relief protection system during power outage

AI intelligent voice control system

FAQ

1. How does hyperbarics work?

Hyperbarics is a technology in which the air pressure in the environment is increased. When a person's body is placed in a more pressure environment, it absorbs more oxygen molecules per volume of compressed air.

The body normally transports oxygen via the hemoglobin of the red blood cells. By increasing the air pressure, oxygen is then driven into the body's fluids, allowing a super-saturation of tissues and organs with oxygen. The increased pressure infuses the body with oxygen, even reaching injuries with damaged circulation.

2. What are the health benefits of hyperbaric oxygen chambers?

Studies have shown that hyperbaric oxygen chambers can treat hypoxic diseases, relieve fatigue, delay aging, prevent cardiovascular disease, improve sleep quality, accelerated wound repair and enhance immunity. We have customers serviced shows hyperbaric oxygen therapy makes very positive results.

3. How long is the treatment?

Usually, we recommend our clients receive the HBOT therapy 5-6 sessions per week, 60-90mins per session. Using frequency or duration can be adjusted according to individual circumstances.

4. Is HBOT safe?

Hyperbaric oxygen therapy is prescribed by a physician and performed under medical supervision. Although there are minor risks like all medical treatments, overall hyperbaric oxygen therapy is extremely safe.

5. Is there anyone who can not use our chamber?

Pregnant ladies, patients who catch a cold or Flu, or those who have rhinitis or otitis media are not recommended to use the chamber.

6. How do you feel inside a hyperbaric oxygen chamber?

When lying in the oxygen chamber, you will feel comfortable and at ease. Also, You may feel a little squeezing of the ears because of the pressure. It is quite normal and can be relieved by chewing or swallowing.

7. After bought the chamber, do I need to by any other things?

No, the price of our chamber includes the chamber capsule, all machines, namely the air compressor, oxygen concentrator, air cooler, and accessories like frame, tubes, etc, so you don't have to buy anything else.

8. Is it complex to install the chamber or change the filter?

Of course not, we will provide you with a video to show you how to install the chamber and change the filter.

We also support online services to help you with all the issues, so don't worry.

9. What is the general time warranty expected for ZHIKANG oxygen chambers?

We will provide one-year warranty and lifelong after-sales services.

If any quality problem/fault in material/design is under correct operation within one year,

If it's easy to fix, we will send new components for free and teach you how to repair them.

(Even after the one-year warranty period, you can also contact us freely and we will be glad to help you.)
