

Space Saving Hyperbaric Oxygen Therapy Chamber Suitable for Hospitals Rehabilitation Centers and Sports Medicine Clinics

Our Product Introduction

Our products please visit us on oxygenconcentratormedical.com

Basic Information

- Place of Origin: SHENZHEN EMENG HEALTH
- Brand Name: O2EMENG
- Certification: CE/FDA/FC/ROHS/UKCA/SGS
- Model Number: EMS03
- Minimum Order Quantity: 1PC
- Price: \$2350
- Packaging Details: wooden packing
- Delivery Time: 15-20 work days
- Payment Terms: D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100PCS

Product Specification

- Highlight: hyperbaric oxygen therapy chamber for hospitals
, space saving hyperbaric chamber for clinics,
rehabilitation hyperbaric oxygen chamber

Product Description:

The Monoplace Hyperbaric Oxygen Chamber represents a significant advancement in hyperbaric therapy, offering users a state-of-the-art solution designed to deliver pure oxygen in a pressurized environment. This innovative device is engineered to provide effective treatment for a wide range of medical conditions, including decompression sickness, carbon monoxide poisoning, wound healing, and various chronic illnesses. As an Advanced Hyperbaric Oxygen Chamber, it incorporates cutting-edge technology to ensure safety, comfort, and efficiency, making it an essential tool for both clinical settings and personal health management.

One of the standout features of the Monoplace Hyperbaric Oxygen Chamber is its ability to accommodate a single patient in a fully enclosed environment, allowing for controlled and consistent oxygen delivery at elevated pressures. This design enhances the therapeutic benefits of hyperbaric oxygen therapy (HBOT) by increasing oxygen concentration in the blood and tissues, thereby promoting faster healing and improved recovery outcomes. The chamber's advanced monitoring systems and user-friendly interface provide precise control over treatment parameters, ensuring optimal therapy sessions tailored to individual needs.

In addition to its advanced functionality, this Hyperbaric Oxygen Chamber is designed with portability in mind. The Portable Hyperbaric Oxygen System option allows users to experience the benefits of hyperbaric therapy without being confined to traditional clinical environments. Lightweight and compact, this system is ideal for home use, sports recovery, wellness centers, and remote medical facilities. Its ease of setup and mobility make it a versatile choice for patients and practitioners seeking reliable and accessible hyperbaric treatments.

The Advanced Hyperbaric Oxygen Chamber integrates robust safety features to protect users during therapy sessions. These include pressure regulation mechanisms, emergency release valves, and continuous oxygen level monitoring to prevent any risks associated with over-pressurization or oxygen toxicity. The chamber's durable construction and high-quality materials ensure long-lasting performance and resistance to wear, making it a dependable investment for long-term health and wellness applications.

Comfort is another critical aspect of the Monoplace Hyperbaric Oxygen Chamber design. The interior is spacious enough to accommodate patients comfortably while maintaining the necessary pressurized environment. The chamber's transparent walls provide a sense of openness and reduce feelings of claustrophobia, which can be a concern in enclosed therapeutic devices. Additionally, the quiet operation and ergonomic design contribute to a more pleasant and relaxing therapy experience, encouraging regular use and adherence to treatment protocols.

Healthcare professionals appreciate the Advanced Hyperbaric Oxygen Chamber for its versatility and effectiveness in treating diverse medical conditions. Its precise control over oxygen concentration and pressure settings allows for customized treatment plans that can be adjusted based on patient response and therapeutic goals. This adaptability makes it suitable for a broad spectrum of applications, from acute medical emergencies to chronic disease management and wellness enhancement.

Furthermore, the Portable Hyperbaric Oxygen System offers unmatched convenience without compromising on therapeutic quality. Its compact form factor and easy transportation make it possible to bring hyperbaric therapy directly to patients who may have limited mobility or live in areas without immediate access to specialized medical centers. This accessibility expands the reach of hyperbaric treatment, enabling more individuals to benefit from enhanced oxygen delivery and improved health outcomes.

In summary, the Monoplace Hyperbaric Oxygen Chamber stands out as an Advanced Hyperbaric Oxygen Chamber that combines cutting-edge technology, safety, comfort, and portability. Whether used in clinical environments or at home, this Portable Hyperbaric Oxygen System delivers effective hyperbaric oxygen therapy that supports healing, recovery, and overall well-being. Its innovative design and reliable performance make it a valuable addition to modern medical and wellness practices, helping patients achieve better health through enhanced oxygen therapy.

Features:

- Advanced Hyperbaric Oxygen Therapy Unit designed for effective treatment
- Durable and safe Medical Hyperbaric Oxygen Unit suitable for clinical use
- Provides 100% pure oxygen in a pressurized environment to enhance healing
- Equipped with user-friendly controls for easy operation by medical professionals
- Compact and portable design for convenient transport and storage
- Constructed with high-quality materials to ensure patient safety and comfort
- Supports a wide range of medical applications including wound healing and recovery
- Includes advanced monitoring systems to track pressure and oxygen levels accurately
- Designed to meet international medical safety standards for Hyperbaric Oxygen Therapy Units
- Energy-efficient system to reduce operational costs without compromising performance

Technical Parameters:

Product Name	Medical Hyperbaric Oxygen Unit
Model	Clinical Hyperbaric Oxygen Chamber
Type	Hyperbaric Oxygen Therapy Unit
Pressure Range	1.0 to 3.0 ATA
Oxygen Concentration	95% - 100%
Chamber Material	Medical Grade Acrylic/Steel
Dimensions (L x W x H)	2200mm x 900mm x 1100mm
Weight	Approx. 180 kg
Power Supply	220V / 50Hz

Control System	Digital Pressure and Oxygen Control Panel
Safety Features	Overpressure Protection, Emergency Vent, Fire Alarm
Application	Clinical Hyperbaric Oxygen Therapy for Medical Use

Applications:

The O2EMENG EMS03 Medical Hyperbaric Oxygen Unit is an advanced solution designed for a variety of health and wellness applications. Manufactured by SHENZHEN EMENG HEALTH, this multiplace hyperbaric oxygen chamber is certified with CE, FDA, FC, ROHS, UKCA, and SGS, ensuring top safety and quality standards. Ideal for both clinical and personal use, the EMS03 model offers effective hyperbaric oxygen treatment that supports accelerated healing, improved oxygen delivery, and enhanced overall recovery.

This hyperbaric oxygen treatment chamber is suitable for medical facilities, rehabilitation centers, sports clinics, and wellness spas. Its multiplace design enables multiple users or treatments within a single session, making it highly efficient and practical for professional environments. Patients suffering from conditions such as chronic wounds, carbon monoxide poisoning, decompression sickness, or ischemic injuries can benefit significantly from sessions in the EMS03 chamber. Additionally, athletes and individuals seeking enhanced physical recovery and improved mental clarity can utilize this hyperbaric oxygen unit for optimized performance.

The EMS03 model from O2EMENG is user-friendly and designed for convenient installation, with a minimum order quantity of just 1PC, making it accessible for smaller clinics or individual practitioners. Priced at \$2350, it offers exceptional value given its advanced features and certifications. The product is supported by flexible payment terms including D/P, T/T, Western Union, and MoneyGram, catering to diverse customer preferences. With a supply ability of 100PCS and a delivery time of 15-20 work days, buyers can expect timely fulfillment of their orders.

Packaging is handled with care using sturdy wooden packing to ensure the product arrives safely and intact. Whether used for acute medical conditions or wellness enhancement, the O2EMENG EMS03 Medical Hyperbaric Oxygen Unit provides a reliable, efficient, and safe hyperbaric oxygen treatment chamber solution. Its combination of advanced technology, professional-grade certification, and practical design makes it an excellent investment for anyone requiring multiplace hyperbaric oxygen therapy.

Support and Services:

Our Hyperbaric Oxygen Chamber is designed to provide safe and effective hyperbaric oxygen therapy for a variety of medical and wellness applications. To ensure optimal performance and longevity of your chamber, we offer comprehensive technical support and services.

Technical Support:

Our team of experienced technicians is available to assist you with installation, setup, and operation of your hyperbaric oxygen chamber. We provide detailed user manuals and troubleshooting guides to help you address common issues quickly and efficiently. For more complex problems, our support staff can guide you through diagnostic procedures to identify and resolve technical difficulties.

Maintenance Services:

Regular maintenance is essential to keep your hyperbaric oxygen chamber functioning safely and effectively. We offer routine inspection and maintenance services, including checks of the chamber integrity, oxygen delivery system, pressure controls, and safety mechanisms. Scheduled maintenance helps prevent unexpected downtime and extends the lifespan of your equipment.

Repair Services:

In the event of a malfunction or damage, our certified repair technicians are equipped to restore your hyperbaric chamber to full working order. We use genuine replacement parts to ensure compatibility and reliability. Repairs are performed promptly to minimize disruption to your therapy sessions.

Training and Education:

We provide comprehensive training programs for operators and healthcare professionals to ensure safe and effective use of the hyperbaric oxygen chamber. Training includes operational procedures, safety protocols, emergency response, and basic maintenance. Customized training sessions can be arranged to meet specific needs.

Warranty and Extended Service Plans:

Our hyperbaric oxygen chambers come with a standard warranty covering defects in materials and workmanship. Additionally, we offer extended service plans that include enhanced support, priority repairs, and regular maintenance visits for added peace of mind. We are committed to supporting you throughout the lifecycle of your hyperbaric oxygen chamber to ensure it delivers the highest standard of care. Please refer to your product documentation for detailed service terms and conditions.

Packing and Shipping:

Product Packaging and Shipping

The Hyperbaric Oxygen Chamber is carefully packaged to ensure maximum protection during transit. Each unit is securely enclosed in a custom-fitted foam mold within a sturdy, double-walled cardboard box to prevent any damage. The packaging also includes waterproof plastic wrapping to guard against moisture and dust.

For added safety, all accessories and components are individually packed and clearly labeled inside the box. Instruction manuals and warranty information are included in a sealed pouch attached to the chamber.

We offer multiple shipping options worldwide, utilizing reliable carriers to ensure timely delivery. The Hyperbaric Oxygen Chamber is shipped with tracking and insurance to provide peace of mind. Handling instructions such as "Fragile" and "This Side Up" are clearly marked on the packaging to ensure proper care during transportation.

Upon receiving the product, please inspect the packaging and chamber for any visible damage and report it immediately to the carrier and our customer service team.

FAQ:

Q1: What certifications does the O2EMENG EMS03 Hyperbaric Oxygen Chamber have?

A1: The O2EMENG EMS03 Hyperbaric Oxygen Chamber is certified with CE, FDA, FC, ROHS, UKCA, and SGS, ensuring it meets international safety and quality standards.

Q2: What is the price and minimum order quantity for the EMS03 model?

A2: The price for one unit of the EMS03 Hyperbaric Oxygen Chamber is \$2350, and the minimum order quantity is 1 piece.

Q3: What payment methods are accepted for purchasing the O2EMENG EMS03 Hyperbaric Oxygen Chamber?

A3: We accept multiple payment terms including D/P, T/T, Western Union, and MoneyGram for your convenience.

Q4: How long does it take to deliver the EMS03 Hyperbaric Oxygen Chamber after placing an order?

A4: The delivery time is typically between 15 to 20 working days after the order is confirmed.

Q5: How is the O2EMENG EMS03 Hyperbaric Oxygen Chamber packaged for shipment?

A5: Each EMS03 unit is carefully packed in wooden packaging to ensure its safety during transportation.

The Use of **Hyperbaric Oxygen Chamber**

Always prepare at home, say goodbye to sub-health

Family

Clubhouse

Beauty Salon

Supercharged Oxygen

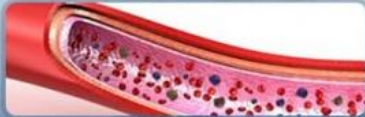

Increase the partial pressure of oxygen in the body.
The hyperbaric chamber can be raised to 30kpa.

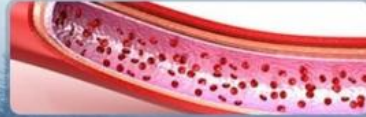

Increase blood oxygen saturation.
Oxygen intake is equivalent to more than 2 times that of normal breathing.

Increase the oxygen diffusion distance in the body.
Use the flow of lymph to increase blood flow.

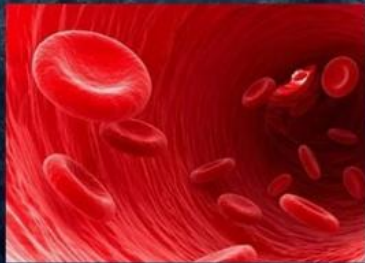

The blood vessel circulation in the human body under normal atmospheric pressure. Various factors impede flow

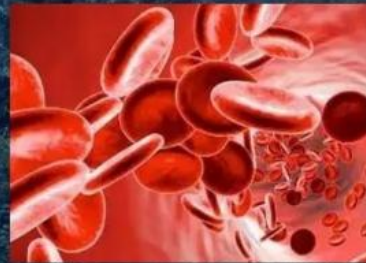

Hyperbaric oxygen chamber speeds up human blood vessel circulation, promote blood flow

Increases the partial pressure of oxygen in the blood, and improves the vascular transport and terminal arrival of oxygen.

Atmospheric Oxygen

At standard atmospheric pressure, blood vessels contain oxygen (atmospheric oxygen)

Supercharged Oxygen

In a hyperbaric oxygen environment, the blood vessels contain oxygen (high concentrations of oxygen)
